Multipurpose Venous Training Arm

Item No. SB23444 L

Weight 2.7kg

Make: Gaumard, USA

[Read More](#)

SKU:

Categories: Injections and Punctures

Product Description

This multipurpose training arm provides all features of a conventional intravenous arm, as well as the ability to practice intramuscular and subcutaneous injections. Use of this superior simulator provides a safe and sanitary teaching and learning experience for you and your students. Demonstrate and train medication administration and aseptic techniques on the human arm. Features:

- Administration of medication by intravenous bolus
- Blood collection exercises with simulated blood
- Intramuscular injection site in deltoid area
- Prominent venous network
- Resealing veins and outer skin

- Realistic “pop” as needle enters vein
- Simulated cephalic, basilic, antecubital, radial, and ulnar veins
- Simulation of clenched fist and tourniquet position
- Simulation of collapsed veins
- Simulation of infusion technique
- Subcutaneous injection areas on the volar side of the forearm and the lateral side of the upper arm

Includes: Instruction manual, set-up kit with simulated blood concentrate, pressure bulb, blood dispensing bag, spare arm skin, funnel, and talcum powder, soft carry bag, and Smoked Lucite® base with stand.

Got it — here's the write-up.

Why Choose the Multipurpose Venous Training Arm — for Your Nursing Skills Lab in India?

The Multipurpose Venous Training Arm (Item No. SB23444 L, Make: Gaumard, USA) is a true all-in-one trainer, combining every feature of a conventional IV arm with the added ability to practice intramuscular and subcutaneous injections — all on one device. It's designed to give students a safe, sanitary environment to train medication administration and aseptic technique from start to finish.

The arm features a prominent venous network with simulated cephalic, basilic, antecubital, radial, and ulnar veins, and reproduces the realistic “pop” felt as a needle enters the vein. Resealing veins and outer skin allow for repeated puncture without premature wear, while built-in simulations of collapsed veins, clenched-fist/tourniquet positioning, and infusion technique help students prepare for real-world variability — not just ideal conditions.

Beyond IV access, the arm includes a dedicated intramuscular injection site in the deltoid area, plus subcutaneous injection areas on the volar forearm and lateral upper arm — supporting a wider range of administration routes on a single trainer.

Includes: Instruction manual, set-up kit with simulated blood concentrate, pressure bulb, blood dispensing bag, spare arm skin, funnel, and talcum powder, soft carry bag, and Smoked Lucite® base with stand.

Weight: 2.7 kg.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Gaumard products in India with over 30 years of experience supplying medical simulators and clinical skills training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Can this arm be used for injections other than IV? A: Yes — it includes a dedicated intramuscular injection site in the deltoid area, as well as subcutaneous injection sites on the forearm and upper arm, in addition to full IV functionality.

Q: Does it come with a stand or base? A: Yes, it includes a Smoked Lucite® base with stand, along with a soft carry bag for storage and transport.

Q: Is simulated blood included? A: Yes — a set-up kit with simulated blood concentrate, pressure bulb, and blood dispensing bag is included.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
