Categories: Injections and Punctures

Product Description

The economical Portable IV Hand Training Hand combines realism, fine detail, and lightweight convenience in a single trainer. This self-contained trainer is packaged in a plastic case that can be converted into a work station. Trainer includes everything you will need to begin training and practicing IV skills. This simulator is constructed of soft material with Life-like veins in the skin surface that are visible and palpable. Veins are accessible through at the back of the hand, making it possible to practice venipuncture at any of the common sites. When puncturing through the vinyl skin and veins, the skin will actually roll as you palpate the veins and the characteristic "pop" can be felt as the needle penetrates the vein. This trainer is the ideal way to teach venipuncture techniques including starting IVs and introducing Over the Needle IV catheters. A realistic flashback will be observed when the needle has been accurately inserted in to the vein. This trainer is inexpensive enough so that each student can

have their own hand to practice techniques and skills required in their courses. Under normal use, hundreds of injections may be performed. The skin and veins cannot be changed so eventually the trainer will need to be replaced. Included with each trainer is two IV bags, packet of blood powder and spoon, plastic fluid supply stand, two pinch clamps, 3 cc syringe, 12cc syringe, 12 gauge needle, a winged infusions set and a plastic clamshell storage case.

This is essentially the hand-based sibling of the Portable IV Arm Trainer covered earlier — same economical, one-per-student, non-replaceable-skin design philosophy, but for **hand-based venipuncture** and in the **dark skin tone**. Worth flagging both the format (hand, not arm) and the non-replaceable skin/veins limitation upfront.

Why Choose the Life/form® Portable IV Hand Trainer, Dark for Your Nursing Skills Lab in India?

The Life/form® Portable IV Hand Trainer, dark (Item No. LF00703, Weight: 1.02kg, Dimensions: 38.1 x 27.9 x 15.2 cm, Make: Nasco Healthcare, USA) is an economical hand-based IV trainer, priced low enough that each student can have their own hand to practice on rather than sharing a single trainer across a class.

Important to know upfront: the skin and veins on this trainer are not replaceable. Under normal use it can withstand hundreds of injections, but once the skin and veins wear out, the trainer itself will need to be replaced rather than refurbished.

The trainer is built from soft material with lifelike veins visible and palpable at the surface, accessible at the back of the hand — one of the most common sites for IV starts in clinical practice. As with the arm version, the vinyl skin rolls naturally as you palpate the veins, and a characteristic "pop" is felt as the needle penetrates the vein, with realistic flashback confirming accurate placement. It's an effective way to teach venipuncture technique, including starting IVs and introducing over-the-needle IV catheters.

Self-contained and portable: the whole kit packs into a plastic case that converts into a work station, making it easy to transport between practice sessions.

What's included: Two IV bags, packet of blood powder with spoon, plastic fluid supply stand, two pinch clamps, 3cc syringe, 12cc syringe, 12-gauge needle, a winged infusion set, and a plastic clamshell storage case.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and clinical skills training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Can the skin and veins be replaced on this trainer? A: No — the skin and veins are not replaceable. The trainer is used until it wears out and then replaced as a whole unit.

Q: Is this suitable for one-per-student practice? A: Yes — it's priced to be economical enough for each student to have their own hand to practice on.

Q: Where are the veins located on this trainer? A: At the back of the hand, one of the most common sites used for IV starts in clinical practice.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
