Categories: Injections and Punctures

Product Description

The economical Life/form® Portable IV Training Arm combines realism, fine detail, and lightweight convenience in a single trainer. This self-contained trainer is packaged in a plastic case that can be converted into a work station. Trainer includes everything you will need to begin training and practicing IV skills. The Life/form® Portable IV Training Arm Trainer is constructed of soft material with life-like veins in the skin surface that are visible and palpable. Veins are accessible at the antecubital fossa and along the forearm, making it possible to practice venipuncture at any of the common sites. When puncturing through the vinyl skin and veins, the skin will actually roll as you palpate the veins and the characteristic “pop” can be felt as the needle penetrates the vein. This trainer is the ideal way to teach venipuncture techniques including starting IVs and introducing Over the Needle IV catheters, and a realistic flashback will be observed when the needle has been accurately inserted into the vein. This trainer is inexpensive enough so that each student can have their own arm to practice technique and

skills required in their courses. Under normal use, hundreds of injections may be performed. The skins and veins cannot be changed (trainer will eventually need to be replaced). Included with each trainer is two IV bags, packet of blood powder and spoon, plastic fluid supply supply stand, two pinch clamps, 3 cc syringe, 12 cc syringe, 12 gauge needle, a winged infusion set, and a plastic clamshell storage case.

The Life/form® Portable IV Training Arm (Item No. LF00701, Weight: 0.77kg, Make: Nasco Healthcare, USA) is an economical trainer built to combine realism, fine detail, and lightweight portability — priced low enough that each student can have their own arm to practice on, rather than sharing a single trainer across a class.

Important to know upfront: the skin and veins on this trainer are not replaceable. Under normal use it can withstand hundreds of injections, but once the skin and veins wear out, the trainer itself needs to be replaced rather than refurbished with a replacement kit.

The trainer is constructed of soft material with lifelike veins that are both visible and palpable at the surface. Veins are accessible at the antecubital fossa and along the forearm, covering the common venipuncture sites. As with pricier trainers, the skin rolls naturally as you palpate, and a characteristic "pop" is felt as the needle penetrates the vein, with realistic flashback confirming accurate placement — making it a solid teaching tool for starting IVs and introducing over-the-needle IV catheters.

Self-contained and portable: the whole kit packs into a plastic case that converts into a work station, so it travels easily between classrooms or practice stations.

What's included: Two IV bags, packet of blood powder with spoon, plastic fluid supply stand, two

pinch clamps, 3cc syringe, 12cc syringe, 12-gauge needle, a winged infusion set, and a plastic clamshell storage case.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and clinical skills training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Can the skin and veins be replaced on this trainer? A: No — unlike some higher-end trainers, the skin and veins on this model are not replaceable. The trainer is used until it wears out and then replaced as a whole unit.

Q: Is this suitable for one-per-student practice? A: Yes — it's priced to be economical enough for each student to have their own arm to practice on.

Q: What comes included with the trainer? A: Two IV bags, blood powder with spoon, a fluid supply stand, pinch clamps, syringes, a needle, a winged infusion set, and a clamshell storage case that doubles as a work station.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
