Geriatric IV Arm

Item No. 140-610U
Weight 5.508kg
Dimensions 91 x 36 x 23 cm
Make: Nasco Healthcare, USA

[Read More](#)**SKU:****Categories:** Injections and Punctures

Product Description

Developed from a live cast, this arm is unique to the industry. Its properties include veins that roll away or disappear as you attempt to catheterize the vessel and a specially developed skin that is exceptionally thin. If your students work with the aged, this adjunct to your teaching lab will enable them to better serve in the future.

	Phlebotomy	IM site	Subcutaneous injection	Intravenous bolus injection	Sterile technique	Infusion technique	Suture, incision and hemiodialysis site	Pressure squeeze bulb and clenched fist simulation	Simulation of collapsed veins	Replacement skin and veins

Why Choose the Geriatric IV Arm for Your Nursing Skills Lab in India?

The Geriatric IV Arm (Item No. 1005777 [W44684], 5.508 kg, 91 × 36 × 23 cm, Make: Nasco Healthcare, USA) is developed from a live cast and is unique in the industry for how accurately it replicates the specific challenges of geriatric venipuncture. Its veins roll away or disappear as students attempt to catheterize the vessel, and the specially developed skin is exceptionally thin — recreating the fragile, mobile veins commonly found in elderly patients.

For programs whose students will work extensively with elderly populations, this adjunct trainer builds a genuinely different skill set than a standard adult IV arm — technique that transfers directly to safer, more confident geriatric care in practice.

Trainable skills: Phlebotomy, intramuscular injection site, subcutaneous injection, intravenous bolus injection, sterile technique, infusion technique, suture/incision/hemodialysis site, pressure squeeze bulb and clenched-fist simulation, simulation of collapsed veins.

Replacement parts available: Skin (1020949), Veins (1021257).

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and clinical skills training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What makes this different from a standard IV training arm? A: It's cast from a live model with exceptionally thin skin and veins that roll away or disappear during catheterization attempts — replicating the specific difficulty of accessing fragile, mobile geriatric veins.

Q: Are replacement parts available? A: Yes — replacement skin (1020949) and veins (1021257).

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
