Categories: Injections and Punctures

Product Description

The I.V. Injection Hand is the ideal simulator for advanced IV training! Now, for the first time, realism is available in an injectable hand simulator. The dorsal surface of the incredibly realistic hand includes injectable metacarpal, digital, and thumb veins. The soft, flexible fingers are molded separately with extreme attention to detail... right down to the fingerprints! Students have the opportunity to develop important manipulation skills provided by the flexion of the wrist. The skin rolls as you palpate the veins, and you'll feel the characteristic "pop" when the vein is entered. The simulated veins and skin are completely replaceable, allowing you to keep your Advanced IV Hand working and looking like new. Under normal use, hundreds of injections may be performed before the veins or skin need to be replaced. Comes in storage box. Includes one pint simulated blood, 2 IV bags, butterfly set, 3 cc syringe, 12 cc syringe, and 22 gauge needle. Fluid supply stand not included. Five-year warranty. This injection simulator is a great teaching and learning tool. Supplied in storage box.

	Phlebotomy	IM site	Subcutaneous injection	Intravenous bolus injection	Sterile technique	Infusion technique	Suture, incision and hemiodialysis site	Pressure squeeze bulb and clenched fist simulation	Simulation of collapsed veins	Replacement skin and veins

The Life/form® I.V. Injection Hand, Light Skin (Item No. LF01139U, 2.95 kg, Make: Nasco Healthcare, USA) is designed for advanced IV training — the first injectable hand simulator of its kind. The dorsal surface features injectable metacarpal, digital, and thumb veins, with soft, flexible fingers molded individually right down to the fingerprints.

Wrist flexion lets students develop important manipulation skills alongside injection technique. The skin rolls realistically as veins are palpated, and a distinct "pop" is felt as the needle enters the vein — genuine tactile feedback matching real clinical practice. Skin and veins are fully replaceable, and under normal use, hundreds of injections can be performed before replacement is needed.

Includes: Storage box, one pint simulated blood, 2 IV bags, butterfly set, 3cc syringe, 12cc syringe, 22 gauge needle.

Please note: a fluid supply stand is **not included** — order separately (LF01022U).

Backed by a five-year warranty.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and clinical skills training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Is a fluid supply stand included? A: No — it's sold separately (LF01022U).

Q: How many injections can the hand withstand before replacement? A: Under normal use, hundreds of injections before the veins or skin need replacing.

Q: What's the warranty? A: Five years.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
