SKU:

Categories: Injections and Punctures

Product Description

The Intraosseous Infusion/Femoral Access Leg will attach directly to any Life/form® Child Airway Management/CPR Torso. Features for intraosseous infusion practice include palpable landmarks including the patella, tibia, and tibial tuberosity; replaceable bones and skin; and a pressurized system to allow aspiration of fluid. For femoral access, features include palpable arterial pulse, realistic flashback from pressurized venous system, replaceable injection pad, and an articulated leg that allows proper positioning. 15-gauge intraosseous infusion needle included. Size: 32" x 7" x 8".

Why Choose the Intraosseous Infusion/Femoral Access Leg, 5 Years Old, for Your Pediatric Emergency Skills Training in India?

The Intraosseous Infusion/Femoral Access Leg (Item No. LF03614U, 2.011 kg, 81.3×17.8×20.3 cm,

Make: Nasco Healthcare, USA) attaches directly to any Life/form® Child Airway Management/CPR Torso, giving your existing 5-year-old pediatric CPR manikin two critical emergency access skills in one add-on.

Intraosseous infusion features: Palpable patella, tibia, and tibial tuberosity landmarks; replaceable bones and skin; pressurized system allowing fluid aspiration for realistic technique confirmation.

Femoral access features: Palpable arterial pulse; realistic flashback from a pressurized venous system; replaceable injection pad; articulated leg allowing proper patient positioning during practice.

Includes: 15-gauge intraosseous infusion needle.

Size: 32" × 7" × 8".
