SKU:

Categories:ALS Child

Product Description

CPR and trauma care simulator with an automatically accurate representation of a one (1) year-old child. It is a superb training tool for pediatric basic life support. The upper torso of the simulator has life-size lungs, heart and ribcage, molded in soft vinyl. This anatomy provides a realistic experience when

practicing cardiopulmonary resuscitation. The simulator is available in 4 configurations. Features:

- Fully articulating head and jaw with teeth and tongue
- Individual disposable airways
- Airway blocked when head is forward
- Easily accessible chest cavity with molded ribcage, lungs and heart
- Realistic chest rise
- Four arterial pulse points
- Soft, lifelike faceskin with molded hair
- Eyes open and close in realistic eyesockets for ophthalmic purpose
- One normal eye and one eye dilated
- Practice regular or Vest CPR
- Exercise suit
- Custom nylon carrying bag
- Instruction Manual

Why Choose the Gaumard One-Year-Old CPR Patient Simulator for Your Simulation Lab in India?

The Gaumard One-Year-Old CPR Patient Simulator (Item No. 1017541, MPN: S111.M) is an anatomically accurate full-body simulation of a 1-year-old child designed for paediatric basic life support training, weighing 6.81 kg. It is positioned as the Pediatric Care Simulator tier in the Gaumard 1-year-old family — above the basic Kim™ and Kevin™ CPR manikins by the addition of four arterial pulse points, and distinct from the CPR Patient Simulator (1014176) and OMNI® configurations by the absence of intraosseous access and femoral venous site. For NRP, paediatric BLS, and nursing training programmes in India that need a realistic 1-year-old patient for airway management, CPR, and pulse assessment training without requiring procedural vascular access modules, this configuration delivers the correct capability at the right tier.

The upper torso features life-size lungs, heart, and ribcage moulded in soft vinyl within an easily accessible chest cavity, providing realistic tactile feedback during compression and ventilation training. The fully articulating head and jaw with teeth and tongue require correct positioning before airway opening succeeds — the airway blocks when the head is forward, enforcing correct head-tilt/chin-lift or jaw thrust technique as a prerequisite for effective ventilation. Individual disposable airways maintain hygienic mouth-to-mouth practice. Realistic chest rise confirms ventilation success. Four arterial pulse points — carotid, femoral, brachial, and one additional — enable assessment training as part of a complete infant resuscitation sequence. The soft lifelike faceskin with moulded hair, eyes that open and close in realistic eye sockets with one normal and one dilated pupil, and anatomically accurate body proportions create the correct patient scale that trainees must adjust their technique to accommodate when moving between adult and paediatric resuscitation scenarios. Both regular and Vest CPR techniques can be practised. An exercise suit and custom nylon carrying bag are included.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Gaumard Scientific products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: Does this simulator include intraosseous or femoral venous access training capability? A: No. IO access and femoral venous site are available in the CPR Patient Simulator (1014176) and CPR Patient Simulator with OMNI® (1020115) configurations. This configuration (1017541) covers CPR, airway management, and arterial pulse assessment.

Q: What is the difference between this simulator and the Pediatric Care Simulator with OMNI® (1020145)? A: The 1020145 adds the OMNI® Code Blue pack for electronic monitoring and logging of compression cadence, depth, and ventilation. This configuration (1017541) has the same CPR, airway, and pulse features but without electronic feedback.

Q: What is the warranty and how do I get support? A: All Gaumard products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
