Categories:ALS Child

Product Description

With the SimPad SkillReporter, you can control up to 6 models wirelessly. When used with the AED and CPR-D models, you can control the heart rate and entire scenarios. This operates wirelessly too, of course. As a teacher, you will see at a glance which trainees are having problems carrying out CPR. The SimPad SkillReporter is the ultimate tool for measuring, assessing and improving CPR performance. The easy-to-operate SimPad SkillReporter software offers a wide range of feedback for high quality CPR training. All important CPR data is measured. The software provides real-time feedback, saves data, and calculates the overall performance, thereby enabling a thorough debriefing. Detailed real-time feedback and a broader range of debriefing options enable the trainees to learn and improve their CPR skills far more effectively than has been possible until now. The following [models](#) are compatible with the SimPad SkillReporter (sold separately): ResusciAnne QCPR Torso 1017683 and Full Body 1017691 (incl. QCPR AED 1017760 + 1017761 and QCPR Defibrillation 1017762 + 1017763) and Resusci Baby QCPR 1017684 (via a USB cable only) Functions

- real-time feedback on CPR performance
- remote control for AED trainers (via the Laerdal Link System)
- the possibility of controlling the heart rate for use with defibrillators
- training in evaluation mode (without real-time feedback if desired)
- detailed evaluations for debriefing
- overview of the improvement in performance
- notes on important events during the CPR simulation
- multi-model overview for group training
- adjustable values for compression and respiration (incl. preset ERC / AHA guidelines)
- project data transfer to PC, printing and external saving with the free session viewer

Characteristics:

- the SimPad is a control device specially developed for the needs of simulation and CPR training
- wireless connection with the ResusciAnne QCPR
- USB connection to the ResusciAnne QCPR and to the ResusciBaby QCPR also possible
- 4 hour battery autonomy; quick-charge facility
- simple data transfer to the PC
- connection with a router possible
- easy to set up and use

The SimPad SkillReporter (Item No. 1017707 | MPN: 202-30033) is an advanced wireless CPR training and assessment device weighing 1.262 kg. It allows instructors to wirelessly control up to 6 compatible manikin models simultaneously, making it ideal for group CPR training sessions. When paired with AED and CPR-D models, instructors can control heart rate and run complete training scenarios. The

easy-to-use software provides real-time feedback on CPR performance, saves training data, and calculates overall performance scores — enabling thorough debriefing sessions. Compatible models include ResusciAnne QCPR Torso, ResusciAnne QCPR Full Body, and Resusci Baby QCPR. With a 4-hour battery life, quick-charge capability, and simple PC data transfer, the SimPad SkillReporter is the ultimate tool for measuring, assessing, and improving CPR skills in any training environment.

Q1. What is the SimPad SkillReporter used for? It is a wireless CPR training and assessment tool that measures, evaluates, and improves CPR performance. It provides real-time feedback and detailed debriefing data for both individual and group training sessions.

Q2. How many manikins can the SimPad SkillReporter control at once? It can wirelessly control up to 6 compatible manikin models simultaneously, making it highly effective for group training environments.

Q3. Which manikin models are compatible with the SimPad SkillReporter? Compatible models include ResusciAnne QCPR Torso (1017683), ResusciAnne QCPR Full Body (1017691), and Resusci Baby QCPR (1017684, via USB cable only). These models are sold separately.

Q4. Does it provide real-time feedback during training? Yes, the SimPad SkillReporter software delivers real-time CPR feedback including compression depth, rate, and ventilation data, allowing trainees to correct their technique instantly during practice.

Q5. What is the battery life of the SimPad SkillReporter? It offers up to 4 hours of battery autonomy with a quick-charge facility, ensuring uninterrupted training sessions.

Q6. Can training data be saved and transferred to a PC? Yes, all training session data can be easily transferred to a PC, printed, or saved externally using the free Session Viewer software included with the device.

Q7. Where can I purchase the SimPad SkillReporter in India? You can enquire and order through SEM Trainers at **+91-88495 63724** or **+91-98791 03905**, or visit semtrainers.com.
