Deluxe Infant Crisis Manikin

Item No. LF03718U
Weight 12.25kg
Dimensions 65 x 44 x 14 cm
Make: Nasco Healthcare, USA

SKU:

Categories:ALS Child

Product Description

Everything you need in one manikin! This dramatic, state-of-the-art training manikin is a complete resuscitation system designed for teaching life-saving techniques for infants. Ideal for pediatric advanced life support, nursing, paramedic, and EMT training at every level. Tactile and visual realism combine to provide students with the most realistic training possible. The most comprehensive PALS trainer available, the Infant CRiSis™ Manikin allows practice of 4-lead ECG monitoring, IV therapy, umbilical catheterization, airway management, intraosseous infusion, and CPR – all in one manikin! The unique chest skin with an umbilical cord allows practice of proper techniques in umbilical catheterization, including cutting and clamping. Fluid may be aspirated through the umbilicus, making this training manikin incredibly lifelike. An IV arm and leg allow for realistic practice of pediatric venipuncture. The cephalic and basilic veins are accessible on the IV arm, as well as the dorsal venous

arch on the hand; the great saphenous veins are accessible on the IV leg, as well as the dorsal venous arch on the foot. An intraosseous infusion leg demonstrates and simulates the intraosseous infusion procedure. Featuring realistic anatomy and size, the airway management head is ideal for practicing airway management skills on an infant. The same procedures can be performed on this manikin as on the Infant CRiSis Manikin (LF03709U) with the addition of the hand-held Interactive ECG Simulator (LF03670U), which allows 4-lead ECG monitoring to be practiced. Built-in circuitry allows defibrillation and pacing directly into the simulator and ECG rhythms can be monitored. The Interactive ECG Simulator also includes a conversion feature and pacing can be done on any manufacturer's defibrillator. Includes Interactive ECG Simulator and a hard carrying/storage case.

Why Choose the Life/form® Deluxe Infant CRiSis™ Manikin for Your Simulation Lab in India?

The Life/form® Deluxe Infant CRiSis™ Manikin (Item No. LF03718U / 1018146) by Nasco Healthcare, USA is the apex of the Infant CRiSis™ family — 12.25 kg, 65 × 44 × 14 cm, with a hard carry case included as standard. It is identical to the Complete Infant CRiSis™ Manikin (LF03709U) in every module — airway management, CPR, ECG/Umbilical Cannulation Skin, IO infusion, IV arm, and IV leg — with one definitive addition: the Interactive ECG Arrhythmia Simulator (LF03670U) is included as standard. This is the only configuration in the Infant CRiSis™ family where the ECG Simulator is not optional. For neonatal resuscitation training centres, NICU in-service departments, and NMC-mandated simulation labs in India that need a complete neonatal PALS platform with fully integrated 4-lead ECG monitoring, arrhythmia recognition, defibrillation, and pacing capability on the same infant manikin, this is that platform.

The Interactive ECG Arrhythmia Simulator (LF03670U) connects directly to the Deluxe Infant CRiSis™ through built-in manikin circuitry, enabling 4-lead ECG monitoring on any standard cardiac monitor without external modification. Trainees can practise rhythm recognition, identify arrhythmias presented by the instructor, make defibrillation decisions, and execute defibrillation and pacing directly through the simulator. The ECG Simulator includes a conversion feature and supports pacing on any manufacturer's defibrillator. This integration transforms the manikin from a procedural skill trainer into a scenario-based neonatal ALS platform where cardiac rhythm management, vascular access, airway management, and umbilical catheterisation all occur on the same patient simultaneously. The complete clinical capability set covers: airway management head with realistic infant anatomy for oral and digital intubation and suctioning; CPR with palpable and visual landmarks, articulated head, neck, and jaw; ECG/Umbilical Cannulation Skin for umbilical catheterisation including cutting, clamping, and fluid aspiration; IV arm (cephalic, basilic, and dorsal venous arch) and IV leg (great saphenous and dorsal venous arch) with smaller lumen tubing simulating infant vein size; and IO infusion leg with palpable tibial landmarks, pressurised aspiration, and replaceable bones and skin.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+

institutions across 28 states. We provide pan-India delivery, on-site installation, ECG Simulator setup and faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What is the only difference between this manikin and the Complete Infant CRiSis™ (LF03709U)? A: The Interactive ECG Arrhythmia Simulator (LF03670U) is included as standard in this configuration. In the Complete, it is optional and must be ordered separately. All other modules — airway, CPR, ECG/Umbilical Cannulation Skin, IO infusion, IV arm, IV leg, and carry case — are identical between the two.

Q: Which defibrillators are compatible for pacing and defibrillation training? A: The built-in circuitry and Interactive ECG Simulator support pacing on any manufacturer's defibrillator. No brand-specific adapters are required.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.

Manikin can be used with Supraglottic airway devices for airway training.
