SKU:

Categories:ALS Child

Product Description

Life/form® Child CRiSis™ Manikins This complete resuscitation system is designed for teaching individuals or groups life-saving techniques for children. It provides complete Pediatric Advanced Life Support (PALS) training capabilities and combines all of the skill stations on one manikin, making training more realistic and giving students an appreciation for the smaller scale of the patient. Simulates a 5-year old child, 118 cm tall and 9 kg in weight. **Airway Management**

- Compatible airway management devices include E.T., E.O.A., E.T.L., L.M.A., E.G.T.A., Combitube®, and King Systems
- Inflatable stomach bladder to indicate esophageal intubation
- Oral, nasal, and digital intubation capabilities
- Realistic anatomical features
- Separate left and right lungs for auscultation

- Suctioning capabilities

Intraosseous Infusion

- Palpable landmarks include the patella, tibia, and tibial tuberosity
- Pressurized system allows aspiration of fluid
- Replaceable bones and skin

Blood Pressure Arm

- Auscultatory gap
- Systolic and diastolic levels, heart rate, and sound volume
- Palpable radial pulse
- Speaker in arm reproduces real blood pressure sounds
- 5 Korotkoff sounds

CPR

- Fully articulated head, neck, and jaw thrust
- Visual landmarks and palpable carotid pulse (manual)

IV Arm

- Articulated at the biceps for antecubital and dorsal access
- Realistic flashback from a pressurized system

Defibrillation Chest

- Compatible with all standard brands and types of defibrillators, monitors, and patient simulators
- Internal load box absorbs full strength shock
- Manual, automatic, and semi-automatic defibrillation
- Rhythms are detected at 4 ECG sites and 2 defibrillation sites

Femoral Access

- Palpable arterial pulse (manual)
- Palpable symphysis pubis and anterior superior iliac spine
- Realistic flashback from pressurized venous system

Why Choose the Life/form® Basic Child CRiSis™ for Your Simulation Lab in India?

The Life/form® Basic Child CRiSis™ (Item No. LF03765U) by Nasco Healthcare, USA is the entry-level configuration in the Child CRiSis™ paediatric ALS manikin family, weighing 11.919 kg and simulating a

5-year-old child patient — 118 cm tall, 9 kg. It provides the two most foundational PALS training capabilities: airway management and CPR. For simulation labs in India that are establishing a paediatric resuscitation training programme on a constrained budget, or that already have separate IV, IO, and defibrillation skill trainers and need only a paediatric airway and CPR platform, this is the correct entry point into the Child CRiSis™ family. The Interactive ECG Simulator (1005666) and carry case (1005651) are both available as optional add-ons.

The airway management module supports the full range of advanced airway devices — ET, EOA, ETL, LMA, EGTA, Combitube®, and King Systems — alongside oral, nasal, and digital intubation. An inflatable stomach bladder confirms oesophageal intubation visually, separate left and right lungs support bilateral auscultation, and suctioning capability is present. The fully articulated head, neck, and jaw thrust mechanism supports correct positioning technique, and a palpable manual carotid pulse enables assessment training integrated into the resuscitation sequence. The CPR module features realistic anatomical landmarks for correct hand placement and paediatric compression technique development. The manikin is also compatible with supraglottic airway devices for extended airway training. Compared to the Complete Child CRiSis™ (1021994) and Deluxe Child CRiSis™ with ECG (1005624), the Basic configuration does not include the blood pressure arm, defibrillation chest, femoral access leg, intraosseous infusion module, or IV arm — those capabilities are present from the Complete configuration upward.

This manikin is the right entry-level choice for PALS training programmes, paediatric emergency medicine skills labs, nursing and paramedic institutes, and NMC-mandated simulation labs in Indian medical colleges that are building paediatric ALS capability incrementally or need a dedicated paediatric airway and CPR training platform.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What is the difference between the Basic Child CRiSis™ (LF03765U) and the Complete Child CRiSis™ (1021994)? A: The Basic configuration includes airway management and CPR only. The Complete adds blood pressure arm, defibrillation chest, femoral access leg, intraosseous infusion, and IV arm — the full PALS procedural skill set. Both support the optional Interactive ECG Simulator and carry case.

Q: Is the Interactive ECG Simulator included? A: No. The Interactive ECG Simulator (Item No. 1005666) is optional and must be ordered separately. It is included as standard only in the Deluxe

Child CRiSis™ with ECG (1005624) and Deluxe Child CRiSis™ with Advanced Airway Management (1021996).

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.

Manikin can be used with Supraglottic airway devices for airway training.
