SMART STAT Complete with VausSim^a

Item No. 101-7500

Weight

Make: Nasco Healthcare, USA

[Read More](#)

SKU:

Categories:ALS Adult

Product Description

Includes SMART STAT Basic manikin (101-8002U), plus the VausSim^a ultrasound simulator described above.

Why Choose the SMART STAT Complete with VausSim™ for Your Simulation Lab in India?

The SMART STAT Complete with VausSim™ (Item No. 101-7500) by Nasco Healthcare, USA is the most comprehensively equipped configuration in the Simulaids SMART STAT ALS simulator family — combining the full clinical capabilities of the SMART STAT Basic manikin (101-8002U) with the VausSim™ ultrasound simulator in a single integrated package. For simulation labs and emergency medicine training programmes in India that need both advanced ALS procedural skill training and point-of-care ultrasound simulation on the same platform, this is the correct configuration. It eliminates the

need to source and integrate a separate ultrasound training system, and ensures that ultrasound-guided assessment is built into ALS scenarios from the outset rather than added as an afterthought.

The SMART STAT Basic manikin provides a complete multi-skill ALS training platform. Airway management capabilities include oral and nasal intubation with ETT, LMA, and King LT® devices, surgical airway access via cricothyrotomy, and bilateral chest rise with BVM ventilation. Vascular access training covers IV access at antecubital and dorsal sites with realistic flashback, intraosseous access at the tibia, and IM injection at arm and thigh sites. The defibrillation chest accepts real defibrillator pads from all standard brands. Bleeding control training is supported via the optional amputated limb modules. The manikin is wireless and battery-operated, enabling field and transport scenario training as well as lab-based ALS sessions. The VausSim™ ultrasound simulator adds the capability to practise probe placement and image interpretation integrated directly into ALS patient assessment — supporting focused assessment with sonography in trauma (FAST), cardiac views, airway confirmation, and vascular access guidance training, all on the same manikin body.

This configuration is the benchmark choice for emergency medicine residency programmes, critical care units, ATLS and ACLS training centres, paramedic institutes, and NMC-mandated simulation labs in Indian medical colleges that need a combined ALS and point-of-care ultrasound training platform in a single purchase.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare and Simulaids products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What is the difference between SMART STAT Complete with VausSim™ (101-7500) and the SMART STAT Basic (101-8002U)? A: The 101-7500 includes everything in the SMART STAT Basic manikin plus the VausSim™ ultrasound simulator — enabling point-of-care ultrasound training integrated into ALS scenarios. The Basic configuration does not include ultrasound simulation capability.

Q: Is a tablet or display device included with the VausSim™ system? A: Please contact us to confirm what display hardware is included or required for the VausSim™ component of this package. Contact: sem@semtrainers.com or +91-88495 63724.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
