Life/form® Complete Ostomy Care Simulator

Item No. LF00895

Weight

Make: Nasco Healthcare, USA

[Read More](#)

SKU:

Categories:Ostomy Care

Product Description

The Life/form® Complete Ostomy Care Simulator is ideal for demonstration and practice of ostomy care procedures. The anatomy of the ostomies are carefully reproduced to provide lifelike functions and appearance. The skin is made of realistic, flesh-like material, and a soft, pliable material is used for the stomas in order to achieve the most realistic tactile sensation. Dilation of the stomas can be demonstrated and practiced, along with application of postoperative and permanent ostomy bags. Practice fitting, cleaning, and changing the pouching system. The simulator consists of three locations to place the interchangeable stomas (healthy stoma, double barrel stoma, prolapsed stoma, and necrotic stoma). The healthy and necrotic stomas can be irrigated and simulated stool can be pumped to provide drainage and excretion at the ostomy. There is a permanent, retracted stoma to practice ostomy care procedures on stomas sunk below skin level. Includes simulator, four stomas, simulated stools, adult ostomy bag, lubricant, syringe with tubing, base, gloves, and infected tissue roll. 14 in. L x

12 in. W x 4 in. D. Five-year warranty.

Life/form® Complete Ostomy Care Simulator (LF00895)

The Life/form® Complete Ostomy Care Simulator (Item No. LF00895) by Nasco Healthcare, USA is ideal for demonstration and practice of ostomy care procedures, with the anatomy of the ostomies carefully reproduced to provide lifelike function and appearance.

Realistic materials for authentic tactile feedback. The skin is made of realistic, flesh-like material, while a soft, pliable material is used for the stomas to achieve the most realistic tactile sensation possible.

Full-cycle ostomy care practice. Dilation of the stomas can be demonstrated and practiced, along with application of postoperative and permanent ostomy bags, plus fitting, cleaning, and changing the pouching system.

Four interchangeable stoma types across three locations. The simulator features three locations to place interchangeable stomas — healthy, double barrel, prolapsed, and necrotic — giving trainees exposure to the full range of stoma presentations they'll encounter clinically.

Realistic drainage simulation. The healthy and necrotic stomas can be irrigated, with simulated stool pumped through to provide realistic drainage and excretion at the ostomy site.

Includes below-skin-level training too. A permanent, retracted stoma lets trainees practice ostomy care procedures on stomas sunk below skin level — a scenario standard stoma models don't cover.

A complete kit, ready for classroom use. Includes the simulator, four stomas, simulated stools, an adult ostomy bag, lubricant, syringe with tubing, base, gloves, and an infected tissue roll. Measures 14" L x 12" W x 4" D. Backed by a five-year warranty, with a downloadable instruction manual available.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: How many stoma types are included? A: Four — healthy, double barrel, prolapsed, and necrotic — placeable across three interchangeable locations, plus a separate permanent, retracted stoma.

Q: What's the warranty? A: Five years.

Q: What's included? A: The simulator, four stomas, simulated stools, an adult ostomy bag, lubricant,

syringe with tubing, base, gloves, and an infected tissue roll.
