SKU:LF00864

Categories:Women's Health Education

Product Description

Pregnancy really can be a struggle, but having breasts that are different can be even more frustrating. Women's breasts are all unique and different. Each breast replica can help educate training medical staff as well as new parents. Each breast is made of soft, lifelike material and includes an instruction card and storage box. Includes: Inverted Nipple (LF00860U) Mastitis (LF00861U) Flat Nipple (LF00862U) Lactating Breast (LF00863U)

Life/form® Common Breast Conditions Replicas — Set of 4 (LF00864)

The Life/form® Common Breast Conditions Replicas — Set of 4 (Item No. LF00864) by Nasco Healthcare gives medical staff and new parents a realistic reference for the range of normal breast variation and common breastfeeding-related conditions, made from soft, lifelike material.

Four distinct conditions in one educational set. The set includes replicas of an Inverted Nipple (LF00860U), Mastitis (LF00861U), Flat Nipple (LF00862U), and Lactating Breast (LF00863U) — covering the variations and conditions healthcare providers and new mothers most commonly encounter during lactation counseling and postpartum care.

Built for both clinical training and patient education. Because breast anatomy varies naturally between individuals, this set is a valuable tool both for training medical staff to recognize and address different presentations, and for reassuring new parents about what's normal versus what needs clinical attention.

Comes ready for use, with each replica accompanied by an instruction card and supplied in a storage box.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What conditions are included in this set? A: Inverted nipple, mastitis, flat nipple, and lactating breast — four replicas covering common breastfeeding-related presentations.

Q: Is this suitable for patient education, not just clinical staff training? A: Yes — it's valuable both for training healthcare providers and for reassuring new parents about normal breast variation.
