LifeLike VI Box with Arm Arch Venipuncture Pump

Item No. SB52872

Weight

Make: Nasco Healthcare, USA

[Read More](#)**SKU:**SB52872**Categories:**Injections and Punctures

Product Description

Affordable, portable, reusable wet lab box for evaluating all vascular anastomosis skills Repair surrounding tissue and skin layer for a complete training experience Use the pulsatile flow pump for arteries or continuous flow pump for veins to check for the quality of the repair Cuts like skin Dissects and sutures like real tissue Use with any LifeLike or silicone femoral or carotid arteries Charges via reusable battery Odor-free and nontoxic Includes 1 box and 1 pad for both ultrasound guided IV access and vascular anastomosis Train on the following skills: Deep and peripheral intravenous access Distal and proximal vascular anastomosis Femoral and carotid endarterectomy Femoral cannulation Incision, dissection, and exposure Ultrasound

Why Choose the LifeLike VI Box with Arm Arch Venipuncture Pump for Your Nursing Skills Lab in India?

The LifeLike VI Box with Arm Arch Venipuncture Pump (Item No. SB52872, Make: Nasco Healthcare, USA) is a fundamentally different type of trainer from the arms, legs, and pads found elsewhere in this category: it's a wet-lab platform for practicing **vascular anastomosis and surgical vessel access skills**, not routine venipuncture or injection technique. Worth stating plainly upfront so buyers looking for standard nursing skills equipment aren't caught off guard — this is built for advanced procedural training.

The affordable, portable, reusable box lets learners evaluate a full range of vascular anastomosis skills, complete with surrounding tissue and skin layers that cut and suture like real tissue for a complete training experience. A **pulsatile flow pump simulates arterial flow**, while a **continuous flow pump simulates venous flow**, letting students check the quality of their own repairs in real time. It's compatible with any LifeLike or silicone femoral or carotid arteries, giving flexibility across different procedural scenarios.

Skills trained:

- Deep and peripheral intravenous access
- Distal and proximal vascular anastomosis
- Femoral and carotid endarterectomy
- Femoral cannulation
- Incision, dissection, and exposure
- Ultrasound-guided technique

Practical features:

- Odor-free and nontoxic materials
- Charges via a reusable battery
- Includes 1 box and 1 pad, supporting both ultrasound-guided IV access and vascular anastomosis practice in one system

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and clinical skills training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Is this a standard venipuncture trainer? A: No — it's a wet-lab platform for vascular anastomosis and advanced vascular access skills, including endarterectomy and femoral cannulation, in addition to IV access.

Q: How does the box let you check repair quality? A: The pulsatile flow pump simulates arterial flow and the continuous flow pump simulates venous flow, so you can check your repair under realistic conditions.

Q: Is it compatible with other vessel models? A: Yes — it works with any LifeLike or silicone femoral or carotid arteries.

Q: How is the unit powered? A: It charges via a reusable battery.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
