Life/form® Pediatric Suture Head Kit

Item No. LF01047
Weight
Make: Nasco Healthcare, USA

[Read More](#)

SKU:LF01047

Categories:Suturing and Bandaging

Product Description

Nasco is pleased to offer the ultimate in suture practice! This appealing trainer will build essential techniques in the repair of almost any laceration to the face and scalp. Great for practice in draping and bedside skills as well. The soft, lifelike skin can be cut and sutured hundreds of times, then simply replaced over the permanent core and base. Completely washable and nontoxic. The trainer comes with scalpel, forceps, needle holder and scissors in a soft case, one nylon suture, simulated blood, and baby powder. Five-year warranty. For replacement head skin see LF01047(A)U.

Why Choose the Life/form® Pediatric Suture Head Kit for Your Simulation Lab in India?

The Life/form® Pediatric Suture Head Kit (Item No. LF01047) by Nasco Healthcare, USA is a paediatric head suturing trainer that builds essential techniques in the repair of lacerations to the face and scalp

of a child — the complete paediatric head laceration training platform covering both anatomy-specific suturing and the draping and bedside skills that accompany laceration repair in a paediatric clinical setting. For paediatric surgery training programmes, emergency medicine residencies, paediatric nursing simulation labs, and NMC-mandated clinical skills labs in India that need a dedicated paediatric head trainer — with correctly proportioned child facial anatomy rather than an adult head — this kit provides that specific training context that adult facial suturing trainers cannot replicate. Backed by a five-year warranty.

The soft, lifelike skin can be cut and sutured hundreds of times before replacement is required, then the skin is simply replaced over the permanent core and base — the core is not consumed, only the skin insert. Replacement head skin is available separately as LF01047(A)U, making this a long-term, low operating cost investment for high-volume training programmes. Simulated blood is included to add clinical realism to the laceration presentation and draping workflow. The instrument kit (scalpel, forceps, needle holder, and scissors in a soft case), one nylon suture, and baby powder are included so trainees can begin practice immediately without sourcing additional equipment.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Q: What is the clinical training scope of this kit? A: Face and scalp laceration repair on paediatric anatomy, plus draping and bedside skill practice — covering the full clinical workflow of paediatric head laceration management.

Q: Is the skin replaceable and what is the replacement part number? A: Yes. The skin can be cut and sutured hundreds of times before replacement. Replacement head skin is available separately as LF01047(A)U.

Q: What is included and what is the warranty? A: Scalpel, forceps, needle holder, and scissors in a soft case, one nylon suture, simulated blood, and baby powder. Five-year warranty.
