SKU:SB38893

Categories: Ear

Product Description

Why Choose the Adam Rouilly AR301 Ear Syringing Trainer for Your Clinical Skills Lab in India?

The Ear Syringing Trainer (Item No. AR301, SKU: SB38893) is a purpose-built ear irrigation training model from Adam Rouilly, UK — designed to give nursing students, general practice trainees, and allied health professionals a safe, realistic environment in which to learn and repeatedly practise ear syringing and aural irrigation technique before performing the procedure on a live patient. For nursing colleges, community health training programmes, and GP skills labs in India where ear syringing

competency is a core clinical requirement, the AR301 provides the anatomical accuracy, correct patient positioning, and tactile realism that classroom instruction alone cannot deliver.

The trainer head is angled correctly for right patient ear syringing and is fully waterproof — essential for a procedure that involves directed water irrigation. The flexible pinna allows the trainee to practise the auricle traction manoeuvre required to straighten the ear canal before syringing, exactly as required in clinical practice. The anatomically correct meatus includes an embedded endoscopic photograph of a normal tympanic membrane showing the handle of the malleus as a landmark — giving trainees a clear visual reference for correct depth and direction of the irrigating stream. Synthetic wax is included to simulate the cerumen that makes ear syringing necessary, allowing repeated wax-removal practice sessions.

> **Note: Syringing equipment (syringe, irrigator, or electronic ear irrigator) is not supplied with this model.** Trainees use their own standard ear syringing equipment.

2-year manufacturer guarantee covering durability and functionality under correct use conditions.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states in India. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Frequently Asked Questions

Q: Does the syringing equipment come with the trainer? A: No — syringing equipment is not included. Trainees use their own standard ear syringe, bulb syringe, or electronic irrigator with this model. Only synthetic wax is supplied.

Q: Is the trainer waterproof? A: Yes. The head is fully waterproof and designed to withstand repeated wet irrigation practice sessions.

Q: Which ear does this trainer replicate? A: The AR301 is angled and configured for the right patient ear.

Q: Can the pinna be moved and manipulated? A: Yes. The pinna is flexible and allows the trainee to practise the auricle traction technique required to straighten the ear canal, exactly as done in clinical practice.

Q: What does the synthetic wax simulate? A: The included synthetic wax simulates cerumen (ear wax) accumulation, allowing trainees to practise the complete syringing workflow — from identifying the need for irrigation through to successful wax removal.

Q: What is the warranty? A: 2 years, covering durability and functionality under correct use conditions.

Q: What is included? A: AR301 trainer head and synthetic wax. Syringing equipment is not included.

The Ear Syringing Trainer offers a safe, realistic way to learn and practise ear irrigation techniques. With a flexible pinna for manipulation, waterproof design, and anatomically accurate ear canal featuring a true tympanic membrane landmark, it provides effective, risk-free training for students and healthcare professionals.

Skills

- Learn syringing without the fear or risk of harming a patient
- The flexible pinna allows manipulation

Features

- Head is waterproof and angled correctly for syringing of the right patient ear
- Anatomically correct meatus with an embedded endoscopic photograph of a normal tympanic membrane showing the handle of the malleus as a landmark

2 Year Guarantee

- This model, manufactured by Adam,Rouilly, comes with a 2 Year Guarantee. This guarantee applies to models which have been used correctly and covers durability and functionality.

Includes

- Synthetic wax

Note

Syringing equipment is not supplied with this model
