**SKU:**SB52890

**Categories:**Nose and Throat Examination

## Product Description

¥ Practice skills for both cosmetic and functional rhinoplasty surgery ¥ Model is suitable for: o Teaching rhinoplasty skills o Open and closed rhinoplasty o Teaching anatomy o Cosmetic surgery o Straightening and improving nose structure o Restructuring and remodeling the nose, particularly a broken nose

**Why Choose the Rhinoplasty Skills Trainer for Your Simulation Lab in India?**

The Rhinoplasty Skills Trainer (Item No. SB52890) by Nasco Healthcare, USA is a surgical skills training model designed for practicing both cosmetic and functional rhinoplasty procedures — covering open rhinoplasty, closed rhinoplasty, anatomical study, cosmetic nasal contouring, straightening and improving nose structure, and restructuring and remodelling of the nose including correction of a broken nose. For ENT surgery training programmes, plastic surgery residency programmes,

maxillofacial surgery training, and surgical skills labs in India that need a physical model for rhinoplasty technique practice before trainees work on live patients, this trainer provides a dedicated nasal anatomy platform for both functional and aesthetic surgical skill development.

Rhinoplasty is one of the most technically demanding surgical procedures in ENT and plastic surgery, requiring a thorough understanding of nasal anatomy combined with precise tissue handling technique under both open and closed approaches — skills that cannot be reliably developed through observation alone and that simulation-based practice on a dedicated nasal model addresses directly. The model supports open and closed approach differentiation in a single trainer, enabling programmes to structure a rhinoplasty curriculum that progresses from anatomical understanding through to closed technique practice and open technique with skin flap elevation — the full surgical learning sequence without patient risk.

**Why Buy from SEM Trainers?** SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

**Frequently Asked Questions**

**Q: What surgical approaches does this trainer support?** A: Both open and closed rhinoplasty approaches on a single model, in addition to anatomical study and functional nasal restructuring techniques.

**Q: Is this suitable for cosmetic as well as functional rhinoplasty training?** A: Yes. The model is designed for both cosmetic nasal contouring and functional procedures including straightening, remodelling, and correction of broken nose structure.

**Q: How do I order from SEM Trainers?** A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing, availability, and product demonstrations.
