Brad; VTA

Item No. 100-2865

Weight

Brand Nasco Healthcare

[Read More](#)

SKU:100-2865

Categories:BLS Adult

Product Description

An easy and cost-effective way to make CPR skills training compliant with the 2019 AHA Guidelines. Has the same look and feel of the lifelike Brad; CPR trainer, which has been a favorite of many instructors for years Economical CPR manikin is made of soft, realistic vinyl plastic over polyurethane foam and rib structure to provide consistent high-quality training Tested true for over a million compressions Durable and easy to use Features include: Long torso for realistic abdominal thrusts Realistic head tilt and chin lift for opening airway Anatomical landmarks including sternum, rib cage, and substernal notch Airway manipulates easily to simulate airway obstruction or choking VTA system combines observable chest rise, which verifies proper ventilation, with visual feedback rate, depth of compressions, and release on compressions Rate light comes on with the correct rate Second light comes on to show correct depth with proper release Both lights on indicate the delivery of quality CPR Includes carry bag, kneeling pads, 3 disposable lung airway systems, 3 channel design

mouth/nosepieces, and a 9V battery Latex free 1-year warranty

Page title problem. "Brad; VTA" with a stray semicolon — should read "Brad™ VTA". Item No. 100-2865, no MPN field, no weight, Brand: Nasco Healthcare ?. This is the AHA-compliant counterpart to the BASICBilly™ products done earlier — where BASICBilly™ lacks feedback and needs an upgrade kit, Brad™ VTA has the feedback system **built in** (VTA = Visual/Tactile/Auditory or similar feedback system). Good detailed existing content: VTA light system (rate light + depth/release light), 1-year warranty, latex-free, tested to 1 million compressions.

DESCRIPTION (copy-paste into WordPress product description):

Why Choose the Brad™ VTA CPR Manikin for Your Simulation Lab in India?

The Brad™ VTA CPR Manikin (Item No. 100-2865) by Nasco Healthcare, USA is an easy, cost-effective way to make CPR skills training compliant with the 2019 AHA Guidelines — built-in visual feedback eliminates the compliance gap that affects feedback-free manikins like the BASICBilly™ range. For BLS certification centres, nursing colleges, and hospital in-service programmes in India that need AHA-compliant feedback without purchasing a separate upgrade kit, Brad™ VTA delivers that capability out of the box, with the same lifelike feel that has made the standard Brad™ CPR trainer a long-standing instructor favourite.

The manikin is constructed from soft, realistic vinyl plastic over polyurethane foam and a rib structure, tested true for over a million compressions — durability built for high-volume training environments. The long torso enables realistic abdominal thrust training, and realistic head tilt/chin lift opens the airway correctly. Anatomical landmarks — sternum, rib cage, and substernal notch — provide correct surface reference points, and the airway manipulates easily to simulate airway obstruction or choking scenarios. The VTA feedback system combines observable chest rise (verifying ventilation) with visual feedback on compression rate, depth, and release: a rate light confirms correct compression rate, a second light confirms correct depth with proper release, and both lights together confirm delivery of quality CPR — giving trainees and instructors unambiguous, real-time confirmation of technique without requiring electronic data logging equipment.

The set includes a carry bag, kneeling pads, 3 disposable lung airway systems, 3 channel-design mouth/nosepieces, and a 9V battery. Latex-free construction. Backed by a 1-year warranty.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Frequently Asked Questions

Q: How does the VTA feedback system work? A: A rate light illuminates when compressions are delivered at the correct rate, and a second light illuminates when compression depth and release are correct. Both lights on together confirm quality CPR delivery in real time.

Q: Is this manikin AHA-compliant out of the box? A: Yes. Unlike base manikins that require a separate feedback upgrade kit, Brad™ VTA has built-in visual feedback designed to support 2019 AHA Guideline compliance from day one.

Q: What is included and what is the warranty? A: A carry bag, kneeling pads, 3 disposable lung airway systems, 3 channel-design mouth/nosepieces, and a 9V battery, backed by a 1-year warranty.
