Econo VTA CPR Trainer

Item No. 100-2160**Weight****Make:** Nasco Healthcare, USA[Read More](#)**SKU:**100-2160**Categories:**BLS Adult

Product Description

The Econo VTA enables students to train and improve their CPR skills in an easy and cost effective manner. This CPR trainer has the same look and feel of the lifelike Economy Sani-Manikin and is affordable enough for each student to have their own manikin. The simple face shield lung system means no cleaning, disinfecting, or disassembly is required. The features include a head tilt/chin lift feature for opening the airway, touch vinyl skin for extended service, and a foam-filled torso for resistance to compressions. The trainer has palpable landmarks to ensure proper hand placement and observable chest rise to verify ventilation. The VTA indication system is easy to understand. A rate light comes on when the correct rate is achieved and a second light comes on to show correct depth with proper release. When the student keeps both lights on, they are delivering quality CPR. Includes three airways and instructions for use.

Good page — Make field already present. Item No. 100-2160, no weight field, Nasco Healthcare, USA ?. Direct economy-tier counterpart to the Brad™ VTA done earlier — same VTA light-feedback system, but built on the "Economy Sani-Manikin" platform rather than Brad™. Same AHA-compliance value

proposition.

DESCRIPTION (copy-paste into WordPress product description):

Why Choose the Econo VTA CPR Trainer for Your Simulation Lab in India?

The Econo VTA CPR Trainer (Item No. 100-2160) by Nasco Healthcare, USA enables students to train and improve their CPR skills in an easy and cost-effective manner, built on the same look and feel as the lifelike Economy Sani-Manikin and affordable enough for each student to have their own manikin. For BLS certification centres, schools, and community CPR outreach programmes in India that need built-in AHA-compliant direct feedback at an economy price point, the Econo VTA delivers the same VTA light feedback system as Nasco's premium Brad™ VTA, on a more budget-friendly platform.

The simple face shield lung system means no cleaning, disinfecting, or disassembly is required — a practical advantage for high-volume, back-to-back training sessions. Features include a head tilt/chin lift mechanism for opening the airway, touch vinyl skin for extended service life, and a foam-filled torso providing realistic resistance to compressions. Palpable landmarks ensure proper hand placement, and observable chest rise verifies effective ventilation.

The VTA indication system is straightforward to understand: a rate light comes on when the correct compression rate is achieved, and a second light comes on to show correct depth with proper release. When the student keeps both lights on, they are delivering quality CPR — giving trainees unambiguous, real-time confirmation of technique without requiring electronic data logging equipment. Includes three airways and instructions for use.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Frequently Asked Questions

Q: How does the VTA feedback system work? A: A rate light illuminates when compressions are delivered at the correct rate, and a second light illuminates when compression depth and release are correct. Both lights on together confirm quality CPR delivery in real time.

Q: How does this differ from the Brad™ VTA? A: Both use the same VTA light feedback system. The Econo VTA is built on the Economy Sani-Manikin platform for a lower price point, while Brad™ VTA uses the premium Brad™ trainer construction.

Q: What is included? A: Three airways and instructions for use.
