Jaw Thrust Brad With Electronics and Carry Bag With Kneeling Pads

Item No. 100-2814

Weight 18 lbs.

Brand Nasco Healthcare

[Read More](#)**SKU:**100-2814**Categories:**BLS Adult

Product Description

The Jaw Thrust Brad manikin offers all of the dependable characteristics that you've come to expect, durability, economy of purchase, ease of use, and simple function with the overall cost of teaching classes held to a minimum. Simulaids combines the CPR training manikin Brad, providing the best possible pricing for this combination. Increase your patient survival by regular practice on these rugged, durable, and easy-to-clean manikins that augment skill learning and retention. Latex free. **Features:**

- Moveable jaw
- Individual mouth piece
- Removable chest plate for adolescent and adult CPR
- One airway per day

- Rugged vinyl skin
- Long-lasting foam filling
- Replacement parts same as Brad
- Electronics indicate correct hand placement, adequate compression depth, and ventilation by individual illuminating lights.

Size: 28" x 17" x 10". Ship weight 18 lbs.

The Jaw Thrust Brad With Electronics and Carry Bag With Kneeling Pads (Item No. 100-2814) is an upgraded, electronics-equipped version of the popular Jaw Thrust Brad CPR training manikin, manufactured by Nasco Healthcare, USA, and weighing 18 lbs (approximately 8.2 kg). Measuring 28" x 17" x 10", this latex-free manikin combines all the trusted features of the Brad range — durability, economy, ease of use, and simple function — with the added advantage of a built-in electronic feedback system for enhanced CPR training.

The electronics provide individual illuminating lights that confirm correct hand placement, adequate compression depth, and proper ventilation — giving both trainees and instructors instant visual feedback during every training session. The manikin features a moveable jaw for jaw thrust airway training, individual disposable mouthpieces for hygienic multi-trainee use, a removable chest plate for both adolescent and adult CPR, rugged vinyl skin, long-lasting foam filling, and a one-airway-per-day design to keep training costs minimal. Replacement parts are the same as the standard Brad manikin, ensuring easy and affordable maintenance. The package includes the manikin, a carry bag, and kneeling pads.

Q1. What is the Jaw Thrust Brad With Electronics used for? It is used for adult and adolescent CPR training and jaw thrust airway management practice, with built-in electronic feedback to confirm correct hand placement, adequate compression depth, and proper ventilation in real time.

Q2. How does the electronic feedback system work? The electronics feature individual illuminating lights that activate when the trainee achieves correct hand placement, adequate compression depth, and correct ventilation volume — providing instant visual confirmation of high-quality CPR technique during training.

Q3. How does this differ from the standard Jaw Thrust Brad (1013162)? The key upgrade in this model (100-2814) is the addition of an electronic feedback system with illuminating indicator lights for hand placement, compression depth, and ventilation. The standard Jaw Thrust Brad (1013162) does not include electronics and relies on the trainer's observation alone.

Q4. What is the jaw thrust feature used for? The moveable jaw allows trainees to practice the jaw thrust maneuver — a critical airway opening technique used in trauma patients where cervical spine injury is suspected and head tilt/chin lift cannot be safely performed.

Q5. Is this manikin latex-free? Yes, the Jaw Thrust Brad With Electronics is fully latex-free, making it safe for use in training environments where latex sensitivity or allergy is a concern.

Q6. What does the one-airway-per-day design mean? A single airway system is used for an entire day of training, significantly reducing the cost of consumables and keeping the overall expense of running CPR classes to a minimum.

Q7. Are replacement parts readily available? Yes, replacement parts for this model are identical to those used for the standard Brad manikin range, making spares easy to source and affordable to maintain.

Q8. What is included in the package? The package includes the Jaw Thrust Brad With Electronics manikin, a carry bag, and kneeling pads for comfortable training posture during CPR practice.

Q9. Who is this manikin ideal for? It is ideal for medical colleges, nursing institutes, BLS certification centers, emergency medical training organizations, first aid training facilities, and any institution seeking an affordable yet electronically enhanced adult CPR and airway management training manikin.

Q10. Where can I purchase this in India? You can enquire and order through SEM Trainers at **+91-88495 63724** or **+91-98791 03905**, or visit semtrainers.com.
