SKU:

Categories:Virtual Reality Simulators

Product Description

A revolutionary way to develop skills with high resolution graphics. Virtual patients answer questions allowing learners to develop their medical diagnostic abilities. Key Features • Low price • Special pricing for classrooms • Industry leading graphics • Minimum space needed for use: 4 sq. ft. • Lifetime license • Unique teleportation feature inside VR section • Fastest setup, load and response time • 200+ medical scenarios in library • Case Manager for creating and editing your own cases • Smart Center with Spectator feature for managing and tracking training • Multi-user capability - ideal for medical schools or simulation centers • Multiple languages: English, Spanish, Arabic, Turkish, Portuguese, German, & more to come Dimensions: 36 cm L x 22 cm W x 13.5 cm H Ship weight: 2.3 kg (5.07 lbs) Options XRC-CM001 - Case Manager Web Service, 150 case scenarios, 1 year XRC-CM002 - Case Manager Web Service, 300 case scenarios, 2 years

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states in India. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Frequently Asked Questions

Q: What is the difference between the XR Clinic Mobile and the MVR-Nursing Virtual Simulator?

A: The XR Clinic Mobile (XRC-M010) is a full multi-discipline medical training platform — 200+ scenarios across all clinical disciplines, multi-user classroom capability, instructor Smart Center, Case Manager, and multilingual support. The MVR-Nursing (MVR-N010) is a nursing-specific system focused on nursing care scenarios — CPR, airway, medication, and ward procedures — for single-trainee sequential use. If your institution trains across multiple disciplines or needs institutional-scale deployment, XR Clinic Mobile is the correct choice.

Q: How much space is required? A: A minimum of 4 square feet — any standard classroom corner or office space is sufficient.

Q: Can instructors build their own scenarios? A: Yes. The Case Manager feature allows instructors to create and edit custom clinical scenarios. Optional Case Manager Web Service subscriptions (XRC-CM001 and XRC-CM002) provide additional pre-built cases on a subscription basis.

Q: Is the software licence perpetual or subscription-based? A: The core platform licence is perpetual (lifetime) with automatic updates included. The optional Case Manager Web Service is a separate subscription (1 or 2 years) for additional scenario library access only.

Q: What languages are supported? A: English, Spanish, Arabic, Turkish, Portuguese, German, and additional languages with more planned. Contact SEM Trainers to confirm current language availability.

Q: Can a whole class observe one trainee's session? A: Yes. The Smart Center Spectator feature allows the instructor and an entire class to watch the active trainee's VR session live on a separate screen — enabling group debriefing without additional headsets.

Q: How many scenarios are included? A: 200+ clinical scenarios in the base library. This can be expanded with the optional Case Manager Web Service (XRC-CM001 for 150 additional cases/1 year, XRC-CM002 for 300 additional cases/2 years).
