Child Airway Management Trainer with Stand

Item No.	LF03609
Weight	
Make:	Nasco Healthcare, USA

Read More

SKU:

Categories: Airway Management Child

Product Description

A simulated head of an 5-year-old child featuring realistic size and anatomy. Perfect for practicing airway management skills on paediatric patients. Realistic anatomy includes mouth, tongue, oral pharynx, larynx, epiglottis, vocal cords, trachea, and esophagus. Separate lungs for auscultation. Inflatable stomach bladder indicates esophageal insufflation. Practice suctioning and oral, nasal, and intubation techniques. Includes training stand to mount head, pump spray lubricant, and hard carrying case. Manual carotid pulse. Five-year warranty.

Why Choose the Life/form® Child Airway Management Trainer with Stand for Your Simulation Lab in India?

The Life/form® Child Airway Management Trainer with Stand (Item No. LF03609) by Nasco Healthcare, USA is a 5-year-old paediatric airway management training head mounted on a stand — the standard child airway management trainer for paediatric intubation, ventilation, suctioning, and

nasogastric tube technique training, with a manual carotid pulse and separate lungs for bilateral auscultation. A training stand, pump spray lubricant, and hard carry case are included as standard, and a downloadable user manual is available on the product page. For PALS training centres, paediatric emergency medicine skills labs, nursing colleges, and NMC-mandated simulation labs in India that need a standalone child airway management trainer for standard paediatric intubation training without difficult airway features, this is the correct entry-level platform. The product carries a five-year warranty.

The standard anatomical landmark set — mouth, tongue, oral pharynx, larynx, epiglottis, vocal cords, trachea, oesophagus, and separate bifurcated lungs — provides the complete reference set for paediatric intubation technique training. Oral, nasal, and standard intubation techniques are supported. The inflatable stomach bladder distends with oesophageal intubation, providing immediate consequence feedback for tube placement verification training. Separate bifurcated lungs enable bilateral auscultation confirmation of correct tube placement. The manual carotid pulse enables integrated pulse assessment training within the paediatric airway management sequence. The suctioning capability supports paediatric suction technique training. The stand presents the head at the correct approach angle for paediatric intubation technique development. For programmes that require tongue oedema, laryngospasm, digital intubation, or the full advanced airway device set on a child-scale trainer, the Life/form® Advanced Child Airway Management Trainer (LF03762) or the Advanced Child Airway Management Trainer Head Only (LF03593U) are the correct upgrades.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: Does this trainer support tongue oedema or laryngospasm? A: No. This is the standard child airway management trainer without difficult airway features. For tongue oedema and laryngospasm training on a 5-year-old patient, the Life/form® Advanced Child Airway Management Trainer Head Only (LF03593U) is the correct upgrade — it attaches directly to this trainer's stand.

Q: What is included as standard? A: Training stand, pump spray lubricant, and hard carry case. A downloadable user manual is available on the product page.

Q: What is the warranty and how do I get support? A: This product carries a five-year warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
