SKU:

Categories: Women's Health Education

Product Description

This model represents a human foetal skull in the 30. week of pregnancy. Size: 12 x 12 x 27 cm, weight: 0.4 kg

Facts About Testicular and Prostate Cancer Display (W43138) — Risk Factors, Symptoms & Screening Awareness

The Facts About Testicular and Prostate Cancer Display (Item No. 1018413 [W43138]) by WRS Group is a folding display that explores testicular and prostate cancer by identifying the risk factors, symptoms, and treatment of each condition.

Built around a clear screening message. The display emphasizes the importance of testicular self-examination and prostate cancer screening — giving men's health programs a tool that goes beyond awareness alone to actively encourage preventive action.

Large format for group presentations. Opening to 58" × 22.5", the display is sized for visibility during group education sessions, health fairs, or classroom presentations, while folding down for easy storage and transport between uses.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What does this display cover? A: Risk factors, symptoms, and treatment for both testicular and prostate cancer, with an emphasis on self-examination and screening.

Q: What size is the display when open? A: 58" × 22.5" — sized for visibility in group presentations, folding down for easy transport and storage.
