SKU:

Categories:ALS Adult

Product Description

The most advanced ALS trainer in its price range, the STAT Simulator with Deluxe Airway Management Head brings you a full range of skills to practice on a life-size manikin. The Deluxe Airway Management Head features anatomical landmarks, tongue edema, laryngospasm, cricothyrotomy, and bilateral carotid pulses. Apply all standard airway adjuncts your agency uses while practicing with this product. The only head of its kind on the market! **Features:**

- Life-like feel

- Flexible stretching characteristics
- Will not be damaged by aggressive intubation
- Tongue is pliable
- Vocal cords reside in a relatively neutral position.
- Upper teeth break out with laryngoscope pressure
- Tongue edema and laryngospasm
- Cricothyrotomy
- Combitube®, LMA, LT, OPA, NPA, and ET devices work

Standard ALS components of ECG rhythm recognition and defibrillation, IV arm, and CPR features are augmented with this list of features:

- Automatic cardioversion upon
- defibrillation
- 17 rhythms
- Pacing
- Bilateral chest decompression sites
- Bilateral chest tube insertion sites
- 12 pulse points (6 pairs) with 3 zones used to demonstrate BP loss
- Venous access from dorsal hand to upper arm with all major veins

Practice sharps control, sterile technique, securing, titrating, phlebotomy. The STAT Manikin comes assembled (except for the lower legs) in its own hard carry case with wheels. Also supplied are replacement parts, shorts, instructions, and accessories. It is recommended that hands-free defibrillation training cables be purchased. Size: 55" x 28" x 11". Ship weight 110 lbs.

Why Choose the Simulaids STAT Manikin with Deluxe Airway Management Head for Your Simulation Lab in India?

The Simulaids STAT Manikin with Deluxe Airway Management Head (Item No. 101-310) by Nasco Healthcare, USA is a full-body adult ALS simulator weighing 49.9 kg (110 lbs), measuring 140 × 71 × 28 cm (55? × 28? × 11?), and shipped assembled in its own hard carry case with wheels. The defining capability that separates this configuration from standard STAT manikins is the Deluxe Airway Management Head — described by Nasco Healthcare as the only head of its kind on the market. It combines anatomically accurate landmarks with tongue oedema simulation, laryngospasm, and cricothyrotomy access in a silicone skin that stretches naturally, will not be damaged by aggressive intubation technique, and supports upper teeth break-out under laryngoscope pressure — the same tactile difficulty that trainees encounter in real clinical difficult airway presentations. For simulation labs in India that need a full-body ALS platform where difficult airway training is a genuine priority rather than an afterthought, this manikin delivers it at a price point well below wire-controlled patient simulators.

The airway module supports the full range of standard adjuncts — Combitube®, LMA, LT, OPA, NPA, and ETT devices — alongside tongue oedema, laryngospasm activation, and cricothyrotomy. The vocal cords reside in a relatively neutral position, the tongue is pliable, and the silicone skin's flexible stretching characteristics allow the mouth to open naturally in the sniffing position. The standard ALS capability set is comprehensive: ECG rhythm recognition and defibrillation with 17 rhythms, automatic cardioversion upon defibrillation, and pacing; a single IV arm with venous access from dorsal hand to upper arm covering all major veins, including sharps control, sterile technique, securing, titrating, and phlebotomy practice; bilateral chest decompression sites; bilateral chest tube insertion sites; and 12 pulse points (6 pairs) with three BP loss zones. Hands-free defibrillation training cables are recommended and available separately. The manikin ships with replacement parts, shorts, instructions, and accessories included.

This manikin is the right choice for ACLS and ALS training centres, emergency medicine residency programmes, paramedic institutes, anaesthesiology skills labs, and NMC-mandated simulation labs in Indian medical colleges that need a full-body ALS platform with genuine difficult airway simulation capability in a portable, hard-cased configuration.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare and Simulaids products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What makes the Deluxe Airway Management Head different from a standard intubation head?

A: Unlike standard heads, this head adds tongue oedema, laryngospasm, cricothyrotomy access, break-out upper teeth under laryngoscope pressure, and a silicone skin that stretches naturally and resists damage from aggressive intubation — replicating difficult airway conditions not available on standard heads.

Q: Are defibrillation training cables included? A: No. Nasco Healthcare recommends purchasing hands-free defibrillation training cables separately. SEM Trainers can supply compatible cables — contact us to confirm.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
