SKU:

Categories:ALS Child

Product Description

For use with Life/form® Infant CRiSis™ Manikins. **Caution:** Use only Life/form® Replacements. Do not use conventional latex tubing. This will cause malfunctioning of the simulator.

why Choose the Life/form® Infant IV Leg Replacement Skin/Veins for Your Simulation Lab in India?

The Life/form® Infant IV Leg Replacement Skin/Veins (Item No. LF03639) by Nasco Healthcare, USA is the genuine OEM combined replacement kit — skin and veins together — for the IV leg module on Life/form® Infant CRiSis™ Manikins. The Infant CRiSis™ IV leg provides access to the great saphenous veins and the dorsal venous arch on the foot, using smaller lumen tubing that simulates the size of an infant's veins with realistic pressurised flashback and replaceable skin and veins. This kit restores both consumable components of the IV leg simultaneously to full factory specification after

high-frequency training use.

The IV leg is a discrete training module from the IV arm (LF03641U) — it targets a different anatomical site and presents different vein access landmarks and insertion angles. Saphenous vein access in infants is a clinically used alternative when upper extremity veins are inaccessible, and trainees must practise locating the great saphenous vein at the medial ankle and the dorsal venous arch on the foot — both of which require distinct technique compared to antecubital or dorsal hand access. As with all IV training consumables, repeated cannulation progressively degrades the skin and vein tubing, causing surface puncture accumulation, loss of self-sealing, and degraded flashback consistency. The leg skin and veins degrade independently of the arm and must be stocked and replaced on their own schedule. Only genuine OEM LF03639 material is guaranteed to match the correct infant lumen dimensions, correct vein channel geometry, and correct flashback pressure for the Infant CRiSis™ IV leg module. **Nasco Healthcare explicitly cautions that only genuine Life/form® OEM replacement components must be used with Infant CRiSis™ Manikins — conventional latex tubing will cause malfunction of the simulator.**

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and genuine OEM consumables to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: What is the difference between this kit (LF03639) and the IV Arm Replacement Skin/Veins (LF03641U)? A: These are separate consumable kits for two distinct IV access modules on the Infant CRiSis™. LF03639 restores the IV leg module — great saphenous and dorsal foot venous access. LF03641U restores the IV arm module — cephalic, basilic, and dorsal hand venous access. Both degrade independently and must be stocked and replaced separately.

Q: Which Infant CRiSis™ simulators is this kit compatible with? A: LF03639 is designed for the IV leg module on Life/form® Infant CRiSis™ Manikins by Nasco Healthcare. Contact us to confirm compatibility with your specific configuration before ordering.

Q: How do I order and get support from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724. We supply genuine Nasco Healthcare consumables with pan-India delivery.
