SKU:

Categories:BLS Adult

Product Description

Why Choose the PRESTAN Professional Adult CPR Training Manikin – Medium Skin, Single Pack for Your Simulation Lab in India?

The PRESTAN Professional Adult CPR Training Manikin – Medium Skin, Single Pack (Item No. PP-AM-100M-MS) by Prestan Products, USA is realistic to the eye and touch, lightweight with fast and simple setup, and fully compliant with current industry guidelines including the most recent AHA Integrated

Feedback Directive. For BLS certification centres, ACLS training centres, and nursing institutes in India that need AHA-compliant direct feedback without the cost of a full electronic patient simulator, this manikin delivers a revolutionary CPR Rate Monitor providing instant rate and depth feedback to both instructor and student simultaneously.

The CPR Rate Monitor uses continuous light-signal rate progression to confirm compressions stay within the 100–120 cpm range recommended by current guidelines — the yellow light blinks specifically when the 120 cpm upper limit is exceeded, warning students to slow down in real time. Instructors can monitor several students quickly and easily across a training room without needing to count compressions manually for each trainee. In addition to the visual rate monitor, students hear a clicker sound when the chest is compressed to the correct 2.0–2.4 inch depth, giving them the true tactile force feedback needed for real-life chest compressions — combining audible depth confirmation with visual rate confirmation in one manikin. For training centres with existing non-monitored PRESTAN Professional Manikins, the CPR Rate Monitor can be purchased separately as an upgrade, protecting the investment in manikins already in service.

Includes 10 adult face-shield/lung-bags, an instruction sheet, and a carry bag. AA batteries are not included. Backed by a three-year limited warranty against defects in workmanship or materials under normal use.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Prestan Products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Frequently Asked Questions

Q: How does the CPR Rate Monitor give feedback? A: Lights continually signal rate progression to confirm compressions stay within 100–120 cpm; a yellow blinking light warns if the rate exceeds 120 cpm. A clicker sound confirms correct compression depth of 2.0–2.4 inches.

Q: Can a non-monitored PRESTAN manikin be upgraded? A: Yes. The CPR Rate Monitor may be purchased separately to upgrade any non-monitored PRESTAN Professional Manikin.

Q: What is the warranty? A: A three-year limited warranty against defects in workmanship or materials under normal use.

The PRESTAN Professional Adult Manikin is realistic to the eye and the touch, unlike any other CPR Training Manikin on the market. Lightweight with fast and simple setup. Equipped with a revolutionary CPR Rate Monitor that allows for instant rate and depth feedback to both the instructor and student. Fully compliant with current industry guidelines, including the most recent AHA Integrated Feedback Directive. **Prestan Professional Adult CPR Training Manikin (installed with Rate Monitor and Depth Clicker for CPR Feedback and AA Batteries not included) Includes:**

- 10 Adult Face-Shield/Lung-Bags
- Instruction Sheet
- Carry Bag

Warranty Information & Guarantee

PRESTAN offers a THREE YEAR LIMITED WARRANTY against any defects in workmanship or materials under normal use with respect to its PRESTAN TRAINING MANIKINS.

Additional Details:

All PRESTAN Professional Manikins are available with a revolutionary CPR Rate Monitor that allows for instant feedback to both instructors and students. The visual feedback from the CPR Rate Monitor gives students a real life feel of delivering 100-120 compressions per minute. Lights continually signal rate progression, confirming compressions are within the 100- 120 cpm range recommended by the Industry Guidelines. The yellow light will blink if the 120 cpm upper limit is exceeded, warning students to slow down. Instructors can monitor several students quickly and easily.

In addition to the visual CPR Rate Monitor, students will also hear a clicker sound as the chest is pushed to the appropriate depth of 2.0 -2.4 inches allowing them to experience the true force needed to deliver real life chest compressions.

The CPR Rate Monitor may be purchased separately to upgrade any non-monitored PRESTAN Professional Manikin.
