Product Description

As with all PRESTAN manikins, the Infant Ultralite Manikin provides a realistic training experience with anatomically correct features, accurate head tilt and visible chest rise while providing intuitive feedback during CPR training. Available in convenient and lightweight Single, 4-pack and 12-packs for efficient on-the-go training. This durable manikin offers an affordable solution for CPR training, with all the quality and realism you expect from PRESTAN. Fully compliant with current industry guidelines, including the most recent AHA Integrated Feedback Directive. Available in medium or dark skin tones in Single, 4-Pack or 12-Pack configurations; also available in 4-Pack or 12-Pack Diversity Kits. All PRESTAN CPR Training Manikins are Made in the USA.

Warranty Information & Guarantee

PRESTAN offers a THREE YEAR LIMITED WARRANTY against any defects in workmanship or materials under normal use with respect to its PRESTAN TRAINING MANIKINS.

Additional Details:

For CPR training instructors who value lightweight, portable products with easy setup and intuitive feedback, the PRESTAN Ultralite series is the perfect solution! The compact design allows for easy transport and cost-effective shipping making it an ideal solution for on-the-go and virtual training. The Infant Ultralite Single is just 1.6-pounds with an easy-to-carry drawstring bag!

Full classroom quantity in one 15.5-pound portable bag!

The PRESTAN Infant Ultralite Manikin is

available with CPR Feedback only. The visual feedback from the CPR Feedback Piston gives students a real life feel of delivering 100-120 compressions per minute. Instructors can monitor several students quickly and easily. When administering CPR slower than 100 compressions per minute, the red LED light will illuminate, letting the student know that they are not performing compressions fast enough. When doing compressions between 100-120 compressions per minute, the LED light will illuminate to a solid green color, letting them know that they are in the ideal compression rate range recommended by Industry Guidelines. A flashing red light signals the student to slow down when they are exceeding 120 compressions per minute. In addition to the visual CPR Rate Monitor, students will also hear a clicker sound as the chest is pushed to the appropriate depth of 2.0 -2.4 inches allowing them to experience

the true force needed to deliver real life chest compressions.

Why Choose the PRESTAN Infant Ultralite® Manikin, Medium Skin, Single Pack for Your Simulation Lab in India?

The PRESTAN Infant Ultralite® Manikin, Medium Skin, Single Pack (Item No. PP-IULM-100M-MS) by Prestan Products, USA is a 1.6-pound (approx. 0.73 kg) infant CPR training manikin from the Ultralite series — engineered for maximum portability without sacrificing the anatomically correct features, accurate head tilt, and visible chest rise that define PRESTAN's training realism. Supplied in an easy-to-carry drawstring bag, the Ultralite series is fully compliant with current AHA Integrated Feedback Directive guidelines and is Made in the USA. For CPR training instructors in India who run sessions across multiple venues — outreach programmes, schools, corporate training, and community CPR drives — where every kilogram of equipment weight and every cubic centimetre of bag space matters, the Ultralite series is purpose-built for on-the-go and portable training delivery.

This configuration provides CPR Feedback only via the built-in Feedback Piston, giving trainees a real-life feel of delivering 100–120 compressions per minute. A visual CPR Rate Monitor with LED indicators guides the trainee in real time: a red light illuminates when compressions are slower than 100 per minute, a solid green light confirms the ideal 100–120 range recommended by current industry guidelines, and a flashing red light signals when the trainee exceeds 120 compressions per minute — enabling instructors to monitor several students simultaneously without individual coaching at every compression. An audible clicker sounds when the chest is compressed to the correct depth of 2.0–2.4 inches, giving trainees the true tactile force feedback needed for effective infant CPR. The manikin carries PRESTAN's three-year limited warranty against defects in workmanship or materials under

normal use.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Prestan Products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: What feedback does this manikin provide during CPR training? A: Visual feedback via an LED CPR Rate Monitor (red for too slow, green for the ideal 100–120 compressions per minute, flashing red for too fast) and audible feedback via a clicker that sounds at the correct compression depth of 2.0–2.4 inches.

Q: What other configurations are available? A: The PRESTAN Infant Ultralite® is also available in dark skin tone, and in 4-pack and 12-pack configurations (including diversity kits combining medium and dark skin tones) for group training.

Q: What is the warranty and how do I get support? A: PRESTAN offers a three-year limited warranty against defects in workmanship or materials under normal use. For support, reach us at sem@sementrainers.com or call +91-88495 63724.
