SKU:

Categories:BLS Adult

Product Description

Why Choose the PRESTAN Ultralite® Manikin – Medium Skin for Your Simulation Lab in India?

The PRESTAN Ultralite® Manikin – Medium Skin (Item No. PP-ULM-100M-MS) by Prestan Products, USA is PRESTAN's most portable manikin — easy to transport and ship, and simple to set up, use, and clean. This durable manikin offers an affordable method for CPR training with all the quality and realism expected from PRESTAN. **Important:** full compliance with current industry guidelines, including the AHA Integrated Feedback Directive, requires the manikin be purchased or upgraded with the Ultralite CPR Feedback Piston — the base manikin alone does not include this capability. For CPR

training instructors in India who value lightweight, portable equipment with easy setup and intuitive feedback — particularly for on-the-go, outreach, or virtual training delivery — the Ultralite series is purpose-built for frequent transport.

Stackable torsos and heads create a compact, portable solution for transporting multiple units: 4-pack at 13 pounds with an easy-carry bag and detachable shoulder strap, or 12-pack at 39 pounds with a roller bag featuring wheels and a telescoping handle — both significantly easier to move between training venues than equivalent quantities of standard-format manikins. With the CPR Feedback Piston installed, the visual feedback gives students a real-life feel of delivering 100–120 compressions per minute: a red LED illuminates when compressions are slower than 100 cpm, a solid green light confirms the ideal 100–120 cpm range, and a flashing red light signals the student to slow down above 120 cpm. A clicker sound confirms correct compression depth of 2.0–2.4 inches, adding tactile force feedback to the visual rate confirmation.

With CPR Feedback Single includes: 1 complete Ultralite Manikin, 1 CPR Feedback Piston, a 10-pack of Ultralite Face-Shield/Lung-Bags, and a carry bag. AA batteries not included. The CPR Feedback Piston is also available as a separate upgrade for any non-monitored PRESTAN Ultralite Manikin. Backed by a three-year limited warranty against defects in workmanship or materials under normal use.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Prestan Products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Frequently Asked Questions

Q: Does the base Ultralite Manikin meet AHA feedback compliance requirements? A: Only if purchased or upgraded with the Ultralite CPR Feedback Piston. The base manikin alone does not include feedback capability.

Q: How are multiple Ultralite manikins packed for transport? A: In stackable packs — 4-pack (13 lbs) with a carry bag and shoulder strap, or 12-pack (39 lbs) with a wheeled roller bag and telescoping handle.

Q: Can the CPR Feedback Piston be added later? A: Yes. It can be purchased separately to upgrade any non-monitored PRESTAN Ultralite Manikin with visual rate and audible depth feedback.

The PRESTAN Ultralite Manikin is our most portable manikin, easy to transport & ship and simple to set up, use & clean. This durable manikin offers an affordable method for CPR training, with all the quality and realism you expect from PRESTAN. Fully compliant with current industry guidelines, including the most recent AHA Integrated Feedback Directive, if purchased (or upgraded) with the

Ultralite CPR Feedback Piston. **Prestan® Ultralite® with CPR Feedback Single Includes:**

- 1 Complete Ultralite Manikin
- 1 CPR Feedback Pistons
- 10-Pack Ultralite Face-Shield/Lung-Bags
- Carry Bag (AA Batteries not included)

Warranty Information & Guarantee

PRESTAN offers a THREE YEAR LIMITED WARRANTY against any defects in workmanship or materials under normal use with respect to its PRESTAN TRAINING MANIKINS.

Additional Details:

For CPR training instructors who value lightweight, portable products with easy setup and intuitive feedback, the PRESTAN Ultralite series is the perfect solution! The compact design allows for easy transport and cost-effective shipping making it an ideal solution for on-the-go and virtual training. Stackable torsos and heads create a compact portable solution for transporting multiple units in packs of 4 (13 pounds) or 12 (39 pounds).

4-Pack easy to carry bag with detachable shoulder strap!

12-Pack roller bag with wheels & telescoping handle!

The PRESTAN Ultralite Manikin is available with CPR Feedback. The visual feedback from the CPR Feedback Piston gives students a real life feel of delivering 100-120 compressions per minute. Instructors can monitor several students quickly and easily. When administering CPR slower than 100 compressions per minute, the red LED light will illuminate, letting the student know that they are not performing compressions fast enough. When doing compressions between 100-120 compressions per minute, the LED light will illuminate to a solid green color, letting them know that they are in the ideal compression rate range recommended by Industry Guidelines. A flashing red light signals the student to slow down when they are exceeding 120 compressions per minute. In addition to the visual CPR Rate Monitor, students will also hear a clicker sound as the chest is pushed to the appropriate depth of 2.0 -2.4 inches allowing them to experience the true force needed to deliver real life chest compressions.
