SKU:

Categories:BLS Child

Product Description

The Prestan Professional Child CPR Training Manikin, Medium Skin (Item No. PP-CM-100M-MS) is a high-quality pediatric CPR training manikin manufactured by Prestan Products, USA. Designed to replicate the proportions and features of a child rather than an adult, it features less prominent body structures and softer, more childlike facial features — making it ideal for realistic pediatric BLS training. It is smaller and thinner than the Prestan Professional Adult Manikin yet equally realistic to the eye and touch.

Fully compliant with current industry guidelines including the latest AHA Integrated Feedback Directive, this manikin comes pre-installed with a CPR Rate Monitor and Depth Clicker that provide instant visual and audio feedback during training. The LED Rate Monitor displays real-time compression rate, signaling when the 100–120 compressions per minute range is achieved and flashing yellow when the upper limit of 120 cpm is exceeded. The Depth Clicker produces an audible click when the chest is compressed to the correct depth of 2.0–2.4 inches, giving trainees a real sense of the force required for

effective CPR. Prestan offers a 3-year limited warranty on all professional manikins. The package includes one medium skin child manikin, 10 child face-shield/lung-bags, an instruction sheet, and a carry bag.

Q1. What is the Prestan Professional Child CPR Training Manikin used for? It is used for pediatric Basic Life Support (BLS) and CPR training, allowing trainees to practice chest compressions and rescue breathing on a realistically proportioned child manikin with built-in feedback features.

Q2. What feedback features does this manikin include? It comes with a CPR Rate Monitor that provides visual LED feedback on compression rate (100–120 cpm) and a Depth Clicker that produces an audible click when the correct compression depth of 2.0–2.4 inches is achieved.

Q3. How does the CPR Rate Monitor work? The LED lights on the Rate Monitor continually signal rate progression during compressions. A yellow light blinks if the 120 cpm upper limit is exceeded, warning trainees to slow down and helping instructors monitor multiple students simultaneously.

Q4. Is this manikin compliant with AHA guidelines? Yes, the Prestan Professional Child Manikin is fully compliant with current industry guidelines, including the most recent AHA Integrated Feedback Directive for CPR training.

Q5. How does this differ from the Prestan Professional Adult Manikin? The child manikin is smaller and thinner with softer, more childlike facial features and less prominent body structures compared to the adult version, making it appropriate and realistic for pediatric CPR training.

Q6. What is included in the package? The package includes one medium skin child manikin, 10 child face-shield/lung-bags, an instruction sheet, and a carry bag. AA batteries for the Rate Monitor are not included.

Q7. What warranty does Prestan offer? Prestan offers a three-year limited warranty against defects in workmanship or materials under normal use for all Prestan Professional Training Manikins.

Q8. Is the CPR Rate Monitor upgradeable on non-monitored manikins? Yes, the CPR Rate Monitor can be purchased separately to upgrade any non-monitored Prestan Professional Manikin.

Q9. Where can I purchase this in India? You can enquire and order through SEM Trainers at **+91-88495 63724** or **+91-98791 03905**, or visit semtrainers.com.

The PRESTAN Professional Child Manikin is designed to look like a child verses an adult with less prominent body structures and softer, more childlike facial features. It is smaller and thinner than the PRESTAN Professional Adult Manikin yet still realistic to the eye and the touch with the same CPR feedback features as the Professional Adult Manikin. Fully compliant with current industry guidelines, including the most recent AHA Integrated Feedback Directive. **Prestan Professional Child CPR Training Manikin (installed with Rate Monitor and Depth Clicker for CPR Feedback and AA Batteries not included).**

Includes:

- One Child Manikin Medium Skin
- 10 Child Face-Shield/Lung-Bags
- Instruction Sheet
- Carry Bag

Warranty Information & Guarantee

PRESTAN offers a THREE YEAR LIMITED WARRANTY against any defects in workmanship or materials under normal use with respect to its PRESTAN TRAINING MANIKINS.

Additional Details:

All PRESTAN Professional Manikins are available with a revolutionary CPR Rate Monitor that allows for instant feedback to both instructors and students. The visual feedback from the CPR Rate Monitor gives students a real life feel of delivering 100-120 compressions per minute. Lights continually signal rate progression, confirming compressions are within the 100- 120 cpm range recommended by the Industry Guidelines. The yellow light will blink if the 120 cpm upper limit is exceeded, warning students to slow down. Instructors can monitor several students quickly and easily. In addition to the visual CPR Rate Monitor, students will also hear a clicker sound as the chest is pushed to the appropriate depth of 2.0 -2.4 inches allowing them to experience the true force needed to deliver real life chest compressions. The CPR Rate Monitor may be purchased separately to upgrade any non-monitored PRESTAN Professional Manikin.
