Product Description

The Prestan Professional Infant CPR Training Manikin, Medium Skin (Item No. PP-IM-100M-MS) is a highly realistic infant CPR training manikin manufactured by Prestan Products, USA. Its lifelike features, weight, and sculpted body contours closely replicate an actual infant, helping trainees prepare for real-life neonatal rescue situations. A key highlight is the head design that simulates the natural movement of an infant's head, with face and head tilt functionality that teaches students the correct technique for opening the airway during CPR.

Equipped with the same CPR Rate Monitor and Depth Clicker feedback features as the Prestan Professional Adult and Child Manikins, this infant model delivers instant visual and audio feedback during training. The LED Rate Monitor displays real-time compression rate, signaling when the 100–120 compressions per minute range is achieved and flashing yellow when the upper limit is exceeded. The Depth Clicker produces an audible click when the chest is compressed to the correct depth of 2.0–2.4 inches, giving trainees a genuine sense of the force needed for effective infant CPR.

Fully compliant with current industry guidelines including the most recent AHA Integrated Feedback Directive. The package includes one medium skin infant manikin, 10 child face-shield/lung-bags, an instruction sheet, and a carry bag. AA batteries for the Rate Monitor are not included. Prestan offers a 3-year limited warranty on all professional manikins.

Q1. What is the Prestan Professional Infant CPR Training Manikin used for? It is used for infant Basic Life Support (BLS) and CPR training, allowing trainees to practice chest compressions and rescue breathing on a lifelike, realistically weighted infant manikin with built-in real-time feedback.

Q2. What makes this infant manikin unique compared to others? The manikin features a head design that accurately simulates the natural movement of an actual infant's head, with face and head tilt functionality that teaches proper airway-opening technique — a critical skill in infant CPR training.

Q3. What CPR feedback features are built in? It includes a CPR Rate Monitor with LED lights that signal real-time compression rate (100–120 cpm) and a Depth Clicker that produces an audible sound when the correct compression depth of 2.0–2.4 inches is reached, providing both visual and audio feedback simultaneously.

Q4. How does the CPR Rate Monitor help instructors? The LED Rate Monitor allows instructors to quickly monitor multiple students at once. The yellow light blinks when the 120 cpm upper limit is exceeded, alerting trainees to slow down and maintain proper rhythm.

Q5. Is this manikin compliant with AHA guidelines? Yes, the Prestan Professional Infant Manikin is fully compliant with current industry guidelines, including the most recent AHA Integrated Feedback Directive for CPR training.

Q6. How does this differ from the Prestan Professional Child and Adult Manikins? The infant manikin is specifically scaled and weighted to replicate a real infant, with a head that moves as an actual infant's head would. The CPR feedback features are identical across the Prestan Professional Adult, Child, and Infant range.

Q7. What is included in the package? The package includes one medium skin infant manikin, 10 child face-shield/lung-bags, an instruction sheet, and a carry bag. AA batteries for the Rate Monitor are not included.

Q8. What warranty does Prestan offer? Prestan offers a three-year limited warranty against defects in workmanship or materials under normal use for all Prestan Professional Training Manikins.

Q9. Where can I purchase this in India? You can enquire and order through SEM Trainers at **+91-88495 63724** or **+91-98791 03905**, or visit semtrainers.com.

The PRESTAN Professional Infant Manikin life-like features and weight allows for realistic infant CPR training. Sculpted body contours and realistic skin feel help prepare students for real life rescues. A

head that simulates the way an actual infant's head would move. Face/head tilt enhances the CPR learning experience and teaches students how to open the airway during CPR. Equipped with the same CPR feedback features as the Professional Adult and Child Manikins. Fully compliant with current industry guidelines, including the most recent AHA Integrated Feedback Directive. **Prestan Professional Infant CPR Training Manikin (installed with Rate Monitor and Depth Clicker for CPR Feedback and AA Batteries not included). Includes:**

- One Infant Manikin Medium Skin
- 10 Child Face-Shield/Lung-Bags
- Instruction Sheet
- Carry Bag

Warranty Information & Guarantee

PRESTAN offers a THREE YEAR LIMITED WARRANTY against any defects in workmanship or materials under normal use with respect to its PRESTAN TRAINING MANIKINS.

Additional Details:

All PRESTAN Professional Manikins are available with a revolutionary CPR Rate Monitor that allows for instant feedback to both instructors and students. The visual feedback from the CPR Rate Monitor gives students a real life feel of delivering 100-120 compressions per minute. Lights continually signal rate progression, confirming compressions are within the 100- 120 cpm range recommended by the Industry Guidelines. The yellow light will blink if the 120 cpm upper limit is exceeded, warning students to slow down. Instructors can monitor several students quickly and easily. In addition to the visual CPR Rate Monitor, students will also hear a clicker sound as the chest is pushed to the appropriate depth of 2.0 -2.4 inches allowing them to experience the true force needed to deliver real life chest compressions. The CPR Rate Monitor may be purchased separately to upgrade any non-monitored PRESTAN Professional Manikin.
