Categories: Virtual Reality Simulators

Product Description

MVR-Nursing is a virtual simulator designed to train nurses in professional skills by immersing them in clinical practice scenarios with a wide variety of virtual patients. Safely perform assessments, administer treatments, and practice team management without harm to live patients across emergency/ICU, pediatric, and medical environments.

The program also allows users to customize medications and scenarios while evaluating performance against standard assessment systems and protocols.

Product includes: VR headset, controllers, carry case and lifetime software license.

KEY FEATURES: • Lifetime license • Automatic updates • Haptic feedback • Patient interaction with dialogue • Unique teleportation feature • Minimum space required (4 sq. ft.) • Over 50 interactive items • Optimized setup, load and response time

EFFECTIVE PRACTICE OF: CPR, airway management, defibrillation, ECG, medication administration, and more.

Dimensions: 36 cm L x 22 cm W x 13.5 cm H Ship weight: 2.3 kg (5.07 lbs.)

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states in India. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Frequently Asked Questions

Q: Which VR headset is included? A: A VR headset is included in the MVR-N010 kit. Contact SEM Trainers to confirm the current headset model bundled with this package, as hardware specifications may be updated by Nasco Healthcare.

Q: How much space does the simulator require? A: A minimum of 4 square feet — any standard office or classroom corner is sufficient. No dedicated VR lab or large open space is required.

Q: Is the software licence perpetual or annual? A: The licence is a lifetime (perpetual) licence with automatic updates included. There are no recurring annual software fees.

Q: Can instructors customise the scenarios? A: Yes. The programme allows users to customise medications and scenarios to match specific curriculum requirements or case presentations.

Q: How is trainee performance assessed? A: Performance is evaluated automatically against standard clinical assessment systems and protocols — no live instructor observation is required during the session.

Q: What clinical environments are included? A: Three environments — Emergency/ICU, Paediatric, and Medical Ward — each populated with interactive virtual patients across a range of clinical presentations.

Q: Can multiple trainees use the same system in one session? A: Yes. Trainees rotate through the headset in sequence. Each scenario can be reset and replayed for each trainee without setup time between sessions.
