SKU:

Categories:Auscultation

Product Description

The Life/form® Adult & Infant Auscultation Training Set includes innovative auscultation training simulators that deliver site-specific sounds heard through the SmartScope™ or external speaker system. This cost-effective set includes the Life/form® Auscultation Trainer and SmartScope™ (LF01142U) and the Life/form® Infant Auscultation Trainer with Airway Management (LF01201). The adult trainer has six anterior heart sites with 12 conditions and five anterior, 10 posterior, and two midaxillary lung sites with 16 conditions. The infant trainer has one anterior heart site with 11 conditions, two anterior and two posterior lung sites with nine conditions, and one bowel sound site with four conditions. The conditions are selected through a remote control, and the sounds are heard through a SmartScope™. Airway management and umbilical cannulation can also be performed on the infant. For classroom training, consider adding the Amplifier/Speaker System (LF01189). **Note:** One remote and one SmartScope™ can be used to program multiple trainers within a 100-ft. radius however, adult remotes and SmartScopes™ are only compatible with Adult Auscultation Trainers, and infant remotes and SmartScopes™ are only compatible with Infant Auscultation Trainers. Five-year

warranty.

This one's actually in decent shape — accurate specs, sensible structure. Genuine gap: the **Weight field is blank**, and this is a two-piece bundle (adult trainer + infant trainer), so leaving weight empty on a freight-quote-driven B2B site is a real omission, not cosmetic — get the combined shipping weight from Nasco before this goes live with quotes.

Why Choose the Life/form® Adult & Infant Auscultation Training Set for Your Simulation Lab in India?

The Life/form® Adult & Infant Auscultation Training Set (Item No. LF01220) by Nasco Healthcare, USA bundles two independent auscultation trainers into a single cost-effective package — the Life/form® Auscultation Trainer with SmartScope™ (LF01142U) for adult-patient training, and the Life/form® Infant Auscultation Trainer with Airway Management (LF01201) for pediatric and neonatal training. For institutions setting up a clinical skills lab that must cover both adult and infant auscultation curricula, buying this set avoids duplicating remote controls, speakers, and training infrastructure across two separate purchases.

The adult trainer covers six anterior heart auscultation sites across 12 cardiac conditions, plus five anterior, ten posterior, and two midaxillary lung sites across 16 respiratory conditions — giving students comprehensive site-specific auscultation coverage on a single manikin. The infant trainer adds one anterior heart site with 11 conditions, two anterior and two posterior lung sites with nine conditions, and a bowel sound site with four conditions, and additionally supports airway management and umbilical cannulation practice — extending the infant unit beyond auscultation alone.

Both trainers use SmartScope™ remote-controlled sound selection, letting instructors switch between conditions instantly for comparison-based teaching. **Note that adult and infant SmartScopes™ and remotes are not interchangeable** — each is calibrated to its respective trainer, so institutions running both units simultaneously in a shared lab space need to keep sets paired correctly (a single remote/SmartScope can control multiple trainers of the *same* type within a 100-ft radius).

For nursing colleges, MBBS clinical skills labs, and NMC-mandated simulation centres in India building out comprehensive auscultation training across patient age groups, this set is the standard starting bundle. Add the Amplifier/Speaker System (LF01189) separately for classroom group demonstration.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and auscultation training accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: What's included in this set? A: The Life/form® Auscultation Trainer with SmartScope™ (adult,

LF01142U) and the Life/form® Infant Auscultation Trainer with Airway Management (LF01201) — two separate trainers, each with its own SmartScope™ and remote.

Q: Can one remote control both the adult and infant trainer? A: No — adult remotes/SmartScopes™ only work with adult trainers, and infant remotes/SmartScopes™ only work with infant trainers. One remote can, however, control multiple trainers of the same type within 100 feet.

Q: Does the infant trainer support anything beyond auscultation? A: Yes — it also supports airway management and umbilical cannulation practice.

Q: What's the warranty? A: Five years.
