SKU:

Categories:AED Trainers

Product Description

The PRESTAN Professional AED Trainer PLUS is a leading-edge AED Trainer that most closely resembles brand AED Trainers in size and weight for a realistic training experience. This AED trainer features customizable options to match various training environments, including a child button. For use with patented PRESTAN Pad Sensing System Clear, confident voice prompts with optional CPR prompts to help the student keep pace with chest compressions. Easy to replace module containing current CPR guidelines and two languages. A remote is optional and available for instructors who prefer this feature. A single remote will control several AED Trainers within its range **Prestan Professional AED Trainer PLUS(4 C batteries not included) Includes:**

- English/Arabic Module
- One set of Adult/Child Training Pads with Pad Sensing System
- Pads Storage Case
- Carry Bag and Instructions

The **PRESTAN Professional AED Trainer PLUS — English/Arabic (Item No. PP-AEDT2-113)** by PRESTAN Products, USA is the English/Arabic language variant of PRESTAN's most realistic, instructor-configurable professional AED trainer. Built on the same leading-edge platform as the English/Spanish and English/French models, this unit ships with the English/Arabic language module installed and is the only AED trainer on the market with Arabic voice prompt capability at this specification level — making it the definitive choice for institutions serving Arabic-speaking student cohorts or operating in bilingual English/Arabic medical education environments.

Key Features:

- **Closest to real AED size and weight** — matched to the footprint of leading brand AEDs for authentic device familiarity; trainees learn on a trainer that feels and operates like the real device they will encounter
- **Patented PRESTAN Pad Sensing System** — verifies correct adult and child pad placement before the scenario advances; the only professional AED trainer that closes the pad placement verification gap
- **English/Arabic voice prompts** — clear, confident bilingual voice guidance; Arabic module pre-installed; fully swappable with any other PRESTAN language module
- **Optional CPR voice prompts** — built-in, switchable prompts guide students through chest compression pacing during combined CPR+AED training scenarios
- **Child button** — single button activates the paediatric AED response sequence; adult and child cardiac arrest training in one unit
- **Swappable language/guideline module** — change language or update to new AHA guidelines by swapping the module; no unit replacement required
- **Remote control compatible** — optional remote (sold separately) allows instructor to control multiple units simultaneously from across the room; single remote works within range of several AED trainers
- **Adult/child training pads with Pad Sensing System** — one pad set covers both patient types
- **Pads storage case, carry bag, and instructions included**
- **3-year limited warranty** against defects in workmanship and materials
- **Power:** 4 × C batteries (not included)

Note on Remote Control: This SKU (PP-AEDT2-113) is the standalone unit — the remote

control is not included but is available separately. Institutions wanting the remote bundled in the box should consider the PRESTAN Professional AED Trainer PLUS Kit (PP-AEDT2-KIT-101), which ships with the remote as standard.

Why Arabic Language Matters for Your Institution:

Arabic is the primary language of 400+ million people globally and is widely spoken in India's medical education sector by students from Gulf and Middle Eastern countries. For institutions running international MBBS programmes, exchange programmes, or serving Gulf-diaspora student cohorts, Arabic-medium AED instruction removes a critical language barrier from life-saving skills training.

Package Contents:

Item	Detail
PRESTAN Professional AED Trainer PLUS unit	×1
English/Arabic Language Module	Pre-installed
Adult/Child Training Pads with Pad Sensing System	×1 set
Pads Storage Case	×1
Carry Bag	×1
Instructions	×1

Ideal For:

- Medical colleges and nursing institutes with Arabic-speaking international student cohorts
- Institutions running international MBBS or exchange programmes with Gulf/Middle East partnerships
- NMC/INC-compliant BLS and ACLS skills stations requiring Arabic-language AED instruction capability
- Skills labs wanting the full PRESTAN Professional PLUS feature set without the remote bundle premium
- Institutions planning to add the remote separately at a later stage

Power	4 × C batteries (not included)
Warranty	3-year limited

Q: What is the difference between this unit and PP-AEDT2-KIT-101 (English/Spanish Kit)?

A: Two differences — language module (Arabic vs Spanish) and package contents (this unit does not include the remote control; the Kit does). All hardware features, CPR prompts, child button, pad sensing, and warranty are identical. Choose this unit if you don't need the remote or plan to add it separately; choose the Kit if you want everything bundled.

Q: Can the Arabic module be swapped for another language later? A: Yes. The language module is a replaceable component — swap to any available PRESTAN language module (English/Spanish, English/French, English/Russian, etc.) or to a future module with updated AHA guidelines, without replacing the trainer unit.

Q: Does this trainer support paediatric AED training? A: Yes. A dedicated child button activates the paediatric AED response sequence, and the included adult/child pad set covers both patient types in a single training session.

Q: What are the optional CPR voice prompts? A: Switchable voice cues that guide students through chest compression rate during combined CPR+AED scenarios. They can be turned off for assessment sessions where independent performance is being evaluated.

Q: Is a remote control available for this unit? A: Yes, but it is sold separately for this SKU. One PRESTAN remote controls multiple Professional AED Trainer PLUS units simultaneously within its wireless range. Contact SEM Trainers to order the remote as an add-on.

Q: Why would an Indian institution need an Arabic-language AED trainer? A: India hosts a significant number of Arabic-speaking medical students from Gulf and Middle Eastern countries through international MBBS programmes. For these students, Arabic-medium BLS instruction is not just a convenience — it is a patient safety imperative, ensuring critical AED skills are learned without language-related cognitive load.

Q: Is this suitable for NMC-compliant BLS skills labs? A: Yes. The PRESTAN Professional AED Trainer PLUS meets NMC-compliant BLS and ACLS AED skills station requirements regardless of language module. The pad sensing, CPR prompts, and child mode make it one of the most complete AED trainers available for structured competency assessment.

Q: What is the warranty? A: 3-year limited warranty from PRESTAN covering defects in workmanship and materials under normal use.

•

Warranty Information & Guarantee

PRESTAN offers a THREE YEAR LIMITED WARRANTY against any defects in workmanship or materials under normal use with respect to its PRESTAN AED TRAINERS.
