SKU:

Categories:AED Trainers

Product Description

The PRESTAN Professional AED Trainer PLUS is a leading-edge AED Trainer that most closely resembles brand AED Trainers in size and weight for a realistic training experience. This AED trainer features customizable options to match various training environments, including a child button. For use with patented PRESTAN Pad Sensing System Clear, confident voice prompts with optional CPR prompts to help the student keep pace with chest compressions. Easy to replace module containing current CPR guidelines and two languages. Comes standard with English/Spanish or English/French language option. A remote available for instructors who prefer this feature. A single remote will control several AED Trainers within its range **Prestan Professional AED Trainer Kit (4 C batteries not included) Includes:**

- One AED Training Unit

- One set of Adult/Child Training Pads with Pad Sensing System
- Pads Storage Case
- Remote Control
- Carry Bag and Instructions.

The **PRESTAN Professional AED Trainer PLUS Kit — English/Spanish (Item No. PP-AEDT2-KIT-101)** by PRESTAN Products, USA is the most feature-complete AED training solution in the PRESTAN range. Combining the Professional AED Trainer PLUS unit with its remote control, training pads, pads storage case, and carry bag in a single ready-to-deploy kit, it delivers the most realistic, instructor-friendly AED training experience available — with size, weight, voice prompts, and form factor matched as closely as possible to real brand AED devices.

What Makes This the PLUS — and Why the Kit Version:

This is not the UltraTrainer. The Professional AED Trainer PLUS is a larger, more feature-rich trainer designed for formal BLS and ACLS classroom training where instructor control and CPR integration matter. The Kit version (this SKU) adds the remote control in the box — the most instructor-requested accessory — so everything needed for a fully configured training station ships together.

Key Features:

- **Closest to real AED size and weight** — designed to match the footprint of leading brand AEDs (Philips HeartStart, ZOLL AED Plus, etc.) for authentic device familiarity training
- **Patented PRESTAN Pad Sensing System** — verifies correct pad placement before advancing; the only AED trainer class that closes the pad placement verification gap
- **Optional CPR voice prompts** — built-in prompts help students maintain chest compression pace during combined CPR+AED training scenarios; switchable on/off
- **Child button** — single button activates paediatric AED response sequence; covers adult and child cardiac arrest training in one unit
- **Clear, confident English/Spanish voice prompts** — bilingual module is easily replaceable with any current or future language module
- **Swappable language module** — change languages or update to new AHA guideline prompts by replacing the module; no full unit replacement required
- **Remote control included** — instructor controls scenario progression, pauses, and restarts for multiple AED trainers simultaneously from across the room; single remote works within range of several units at once
- **Adult/child training pads with Pad Sensing System** — one set covers both patient types
- **Pads storage case included** — organised, protected pad storage between sessions
- **Carry bag and instructions included**

- **3-year limited warranty** against defects in workmanship and materials
- **Power:** 4 × C batteries (not included)

Kit Contents:

Item	Detail
PRESTAN Professional AED Trainer PLUS unit	×1
Adult/Child Training Pads with Pad Sensing System	×1 set
Pads Storage Case	×1
Remote Control	×1
Carry Bag	×1
Instructions	×1

Ideal For:

- NMC/INC-compliant BLS and ACLS AED skills stations requiring realistic device form factor and instructor remote control
- Medical college and nursing institute simulation labs running structured AED competency assessments
- Large-group BLS training where the instructor needs to control multiple AED trainers simultaneously from a distance
- Institutions where combined CPR + AED training with voice-guided CPR pacing is required
- Skills labs investing in a professional-grade, long-service AED trainer with swappable guideline modules

Specification	Detail
Item No.	PP-AEDT2-KIT-101
Make	PRESTAN Products, USA
Languages	English / Spanish (swappable module)
CPR Prompts	Yes – optional, switchable
Child Mode	Yes – dedicated child button
Pad System	Patented PRESTAN Pad Sensing System
Remote Control	Included – controls multiple units
Power	4 × C batteries (not included)
Warranty	3-year limited

Q: What is the difference between this (PP-AEDT2-KIT-101) and the PRESTAN AED UltraTrainer™? A: The Professional AED Trainer PLUS is the larger, higher-specification model. Key upgrades over the UltraTrainer are: built-in optional CPR voice prompts for combined training, a dedicated child button for paediatric scenarios, a size and weight matched to real brand AEDs for device familiarity, and a swappable language module rather than a toggle. The

Kit version of this product also includes the remote control in the box. Institutions running formal BLS or ACLS classroom assessments with an instructor managing multiple stations should choose the PLUS Kit; those needing ultra-compact standalone stations may prefer the UltraTrainer.

Q: What does the remote control do? A: The included remote allows the instructor to start, pause, and control scenario progression on multiple PRESTAN Professional AED Trainer PLUS units simultaneously from across the room. This is essential for large-group training where the instructor cannot physically reach each station to intervene.

Q: What are the CPR voice prompts and when are they used? A: The CPR prompts are optional, switchable voice cues that guide the student through chest compression pacing during the AED scenario — helping trainees maintain the correct rate while simultaneously managing the AED. They can be turned off for assessment sessions where students are expected to perform independently.

Q: How does the child button work? A: A dedicated child button on the trainer activates the paediatric AED response sequence, simulating the reduced energy delivery and adjusted pad placement guidance appropriate for paediatric cardiac arrest. This allows adult and child AED training within the same session and on the same unit.

Q: Can the language module be changed? A: Yes. The language module is a replaceable component — change from English/Spanish to English/French or any available future module without replacing the trainer unit. This also means AHA guideline updates are delivered via module swap rather than full unit replacement.

Q: How many AED trainers can one remote control? A: One remote controls all PRESTAN Professional AED Trainer PLUS units within its wireless range — no unit limit specified, making it ideal for large multi-station labs.

Q: Is this suitable for NMC-compliant BLS skills labs in India? A: Yes. The PRESTAN Professional AED Trainer PLUS Kit meets NMC-compliant BLS and ACLS AED skills station requirements. The remote control and CPR prompts make it particularly suited to formal competency assessment in structured classroom settings.

Q: What batteries are required? A: Four C batteries for the trainer unit (not included). The remote control battery requirement should be confirmed in the manual.
