SKU:

Categories:AED Trainers

Product Description

The PRESTAN AED UltraTrainer is our most compact, lightweight AED trainer solution with full customization options to accommodate any classroom training situation. This AED trainer resembles a live training experience like no other on the market. For use with patented PRESTAN Pad Sensing System. Programming can toggle between two languages and is easily upgradeable for any AHA guideline changes. **Prestan AED UltraTrainer™ Single Unit with English/Spanish Languages (3 “C” batteries not included) Includes:**

- One set of Adult/Child Training Pads with unique Pad Sensing System,

- Pads storage tray,
- Instructions and carry bag

Warranty Information & Guarantee

PRESTAN offers a THREE YEAR LIMITED WARRANTY against any defects in workmanship or materials under normal use with respect to its PRESTAN AED TRAINERS.
The **PRESTAN AED UltraTrainer™ Single Unit — English/Spanish (Item No. PP-AEDUT-101)** by PRESTAN Products, USA is the most compact, lightweight, and customisable AED trainer in the PRESTAN range — and one of the most realistic AED training experiences available on the market today. Designed for maximum flexibility in any classroom or skills lab environment, it features PRESTAN's patented Pad Sensing System, field-switchable bilingual operation, and future-proof AHA guideline upgradeability — making it the smart long-term investment for any institution running BLS or first responder training.

Key Features:

- **Most compact and lightweight in its class** — ultra-portable design makes it ideal for multi-station labs, mobile training, and community outreach programmes
- **Patented PRESTAN Pad Sensing System** — detects correct pad placement by the trainee; provides realistic, accurate simulation of the AED pad application step that most trainers skip entirely
- **Bilingual English/Spanish toggle** — language switches between English and Spanish at the touch of a button, with no hardware change required; ideal for diverse student cohorts
- **Fully upgradeable for AHA guideline changes** — programming can be updated in the field to reflect any future AHA/ILCOR protocol revisions, protecting the institution's investment over time
- **Highly realistic training simulation** — closest to a live AED training experience available in this form factor; voice prompts guide trainees through the full cardiac arrest response sequence
- **Adult/child training pad compatibility** — single set of pads supports both adult and paediatric AED training scenarios
- **Pads storage tray included** — organised, hygienic pad storage between sessions
- **Carry bag included** — easy transport and storage
- **3-year limited warranty** against defects in workmanship and materials
- **Power:** 3 × C batteries (not included)

Ideal For:

- NMC/INC-compliant BLS and first responder AED skills stations in medical colleges and nursing institutes
- Institutions that require bilingual English/Spanish training delivery
- Skills labs investing in durable, future-proof AED trainers that won't become obsolete with guideline changes
- Multi-station BLS labs where portability and compact storage matter
- Community CPR + AED awareness and public access defibrillation programmes
- AYUSH and allied health institutions building emergency simulation capability

Specification	Detail
Item No.	PP-AEDUT-101
Make	PRESTAN Products, USA
Languages	English / Spanish (switchable)
Pad System	Patented PRESTAN Pad Sensing System
Pad Compatibility	Adult and child (single set)
Power	3 × C batteries (not included)
Warranty	3-year limited
AHA Guideline Updates	Field-upgradeable
Includes	Training pads, pads storage tray, carry bag, instructions

Q: What makes the PRESTAN AED UltraTrainer™ different from other AED trainers? A: Three standout features set it apart — the patented Pad Sensing System that verifies correct pad placement (which most trainers do not check), field-switchable bilingual operation between English and Spanish, and firmware upgradeability for future AHA guideline changes. It is also the most compact and lightweight trainer in its class, making it the most flexible option for multi-station and mobile training environments.

Q: What is the Pad Sensing System and why does it matter? A: PRESTAN's patented Pad Sensing System detects whether the trainee has correctly placed the training pads on the manikin before the trainer advances. This closes a critical gap in most AED training programmes where pad placement is demonstrated but not verified — significantly improving training accuracy and real-world preparedness.

Q: Can the language be switched without replacing any hardware? A: Yes. The trainer toggles between English and Spanish with a simple button press — no module swaps, no additional purchases. This makes it ideal for institutions with mixed-language student groups or those delivering training in multiple languages across shifts.

Q: Will this trainer need to be replaced when AHA guidelines change? A: No. The PRESTAN AED UltraTrainer™ is designed to be field-upgradeable — the programming can be updated to reflect any future AHA/ILCOR guideline revisions. This is a significant long-term cost advantage over trainers that require complete replacement when protocols change.

Q: Does this support both adult and child AED training? A: Yes. The included training pad set is compatible with both adult and paediatric AED pad placement scenarios, making it a dual-use resource for comprehensive BLS training.

Q: What batteries does it require? A: Three C batteries, which are not included. Unlike AA or AAA battery units, C batteries provide longer operational life per set — reducing battery replacement frequency in high-use labs.

Q: Is this suitable for NMC-compliant BLS skills labs in India? A: Yes. The PRESTAN AED UltraTrainer™ fully supports the AED operation competency requirements for NMC-compliant BLS skills stations in medical college and nursing institute simulation labs. Its upgradeability ensures continued compliance as AHA guidelines evolve.

Q: What is the warranty on this product? A: PRESTAN offers a 3-year limited warranty against defects in workmanship and materials under normal use conditions.
