SKU:

Categories:ALS Adult

Product Description

The HAL® S315.600.250 CPR+D Skills Trainer Torso with OMNI® 2 is the newest addition to the S315 family of CPR skills trainers. The durable all-in-one design eliminates the need for external pumps, compressors, or attachments, making this CPR training torso portable enough for traveling CPR outreach instructors and strong enough to train professionals in-house.
EASY-TO-USE, DURABLE, & PORTABLE HANDS-ON BLS TRAINING

Whether for outreach or professional development, the new HAL S315.600.250 is a great addition to every basic life support training curriculum. Practice assessing breathing, performing quality CPR,

delivering a shock, and recognizing return of spontaneous circulation. HAL is the portable, all-in-one training solution for every training need.

Programmable EKG

Illustrate shockable and non-shockable EKG with 20+ preprogrammed rhythms

Intubatable Airway

Perform nasal and oral intubation with standard, real adjuncts

Realistic Chest Rise

Visualize realistic chest rise with BVM ventilation

Spontaneous Chest Rise and Pulse

Identify proper chest rise and pulses without add-on items

Monitor with Real Equipment

Use real AED/defibrillator to monitor programmable EKG

Real Energy Defibrillation

Defibrillate directly on conductive skin patches or pad-free posts with up to 360 joules of real energy from real equipment

Feedback and Control

See immediate feedback on actions and easily select the appropriate responses

Post-cardiac Arrest

Train to check for the return of spontaneous circulation (ROSC)

Debriefing Tools

OMNI® 2 automatically detects and records events for easy debriefing

Resuscitation Training with OMNI® 2

The new OMNI® 2 features basic life support specific simulation tools designed to help boost skill acquisition, enhance the simulated experience, and support assessment and debriefing. It's the one handy tool that can do it all.

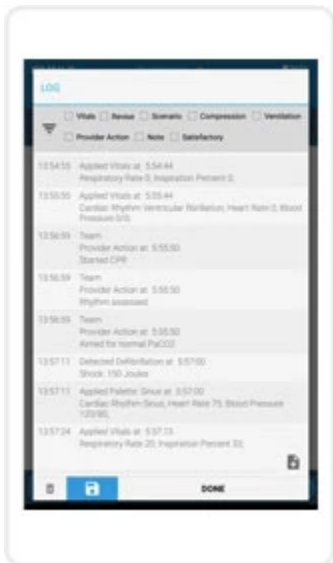

Real-time eCPR™ feedback

The OMNI® 2 features CPR coaching and evaluating modes. In the CPR coach mode audible tones guide compression rate and ratio for learners. In the evaluating mode real-time monitoring of CPR metrics provides feedback of time to CPR, compression depth and rate, ventilation rate and volume, “no-flow” time, and number of cycles.

eCPR™ Performance Reports

Set parameter goals, evaluate individual and/or team efforts, and save and share reports to discuss and improve quality of CPR.

Data-rich Debriefing Tools

Automatically records events during simulation. Select from lists of common actions specific to a scenario type or algorithm. Save and share session logs for archiving and debriefing.

- HAL® S315.600.250 Skills Trainer

- OMNI® 2 Wireless Control Interface
- Carrying Case
- Operating Guide
- A/C Adapter
- HAL S315.600 Skills Trainer, OMNI2 Controller, carrying case, user manual, and power supply

A note before proceeding: This product (S315.600.250.PK) is essentially the same trainer as the ECG version (S315.600.250.PK1) already done — same torso, same OMNI®2, same feature set, minus the 4-lead ECG sites. The descriptions will necessarily be very similar. I'm writing distinct copy that calls out exactly what differentiates this SKU.

DESCRIPTION (copy-paste into WordPress product description):

Why Choose the HAL® S315.600.250 CPR+D Skills Trainer Torso with OMNI®2 for Your Simulation Lab in India?

The HAL® S315.600.250 CPR+D Skills Trainer Torso with OMNI®2 (Item No. S315.600.250.PK) by Gaumard, USA is the core torso configuration of the S315.600 CPR+D skills trainer family — a durable, fully portable, all-in-one BLS training platform designed for medical colleges, nursing institutions, hospitals, paramedic training institutes, and community CPR outreach programmes across India. Its self-contained design eliminates the need for external pumps, compressors, or add-on attachments, making it equally suited to a fixed simulation lab and to field-based outreach instructor programmes where portability and quick setup are critical. The complete package includes the HAL S315.600.250 Skills Trainer torso, OMNI®2 wireless controller, carrying case, operating guide, and AC adapter.

The training capabilities cover the full BLS cycle. The intubatable airway supports nasal and oral intubation with standard real adjuncts, and realistic chest rise is visible with BVM ventilation. Spontaneous chest rise and palpable pulses function without any add-on accessories. Over 20 pre-programmed ECG rhythms can be displayed, covering both shockable and non-shockable scenarios, and real AED or defibrillator equipment can be applied directly on the manikin's conductive skin patches or pad-free posts with up to 360 joules of real energy — no training pads required. ROSC recognition training is integrated into the platform.

The OMNI®2 wireless controller provides two distinct modes. In CPR coach mode, audible tones guide learners on compression rate and ratio in real time. In evaluating mode, the system tracks time to CPR, compression depth and rate, ventilation rate and volume, no-flow time, and number of cycles — generating eCPR™ performance reports that can be benchmarked against parameter goals, saved, and shared for structured debriefing. Session events are automatically recorded with scenario-specific action logs for post-session review and archiving.

This trainer is the right choice for institutions that need the core CPR+D and OMNI®2 feedback capability in a compact, highly portable torso format without the 4-lead ECG site add-on included in the PK1 configuration.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized Gaumard distributor in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation and OMNI®2 setup, faculty orientation workshops, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What is the difference between this model (S315.600.250.PK) and the S315.600.250.PK1? A: The PK1 includes 4-lead ECG sites for monitoring programmable rhythms with real defibrillator equipment. This PK configuration is the core CPR+D torso with full OMNI®2 feedback without the ECG monitoring sites — a more cost-effective choice for programmes focused purely on CPR+D skill development.

Q: Does SEM Trainers provide installation and training support? A: Yes. We provide on-site setup, OMNI®2 configuration, hands-on demonstration, and faculty orientation anywhere in India.

Q: What is the warranty and how do I get support? A: All Gaumard products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
