## HAL® S315.600 CPR+D Skills Trainer with OMNI®2 full-body option

Item No. S315.600.250.705

Weight

Make: Gaumard, USA

**SKU:**

**Categories:**ALS Adult

### Product Description

The HAL® S315.600.250 CPR+D Skills Trainer Torso with OMNI® 2 is the newest addition to the S315 family of CPR skills trainers. The durable all-in-one design eliminates the need for external pumps, compressors, or attachments, making this CPR training torso portable enough for traveling CPR outreach instructors and strong enough to train professionals in-house.

### HAL® CPR+D Skills Trainer with OMNI® 2

**Model: S315.600.250**

**EASY-TO-USE, DURABLE, & PORTABLE HANDS-ON BLS TRAINING**

**Whether for outreach or professional development, the new HAL S315.600.250 is a great addition to every basic life support training curriculum. Practice assessing breathing, performing quality CPR, delivering a shock, and recognizing return of spontaneous circulation. HAL is the portable, all-in-one training solution for every training need.**

**Programmable EKG**

non-shockable EKG with 20+ preprogrammed rhythms

**Intubatable Airway**

Perform nasal and oral intubation with standard, real adjuncts

### **Realistic Chest Rise**

Visualize realistic chest rise with BVM ventilation

### **Spontaneous Chest Rise and Pulse**

Identify proper chest rise and pulses without add-on items

### **Monitor with Real Equipment**

Use real AED/defibrillator to monitor programmable EKG

### Real Energy Defibrillation

Defibrillate directly on conductive skin patches or pad-free posts with up to 360 joules of real energy from real equipment

### Feedback and Control

actions and easily select the appropriate responses

### Post-cardiac Arrest

Train to check for the return of spontaneous circulation (ROSC)

## Debriefing Tools

OMNI® 2 automatically detects and records events for easy debriefing

The new OMNI® 2 features basic life support specific simulation tools designed to help boost skill acquisition, enhance the simulated experience, and support assessment and debriefing. It's the one handy tool that can do it all.

## Real-time eCPR™ feedback

The OMNI® 2 features CPR coaching and evaluating modes. In the CPR coach mode audible tones guide compression rate and ratio for learners. In the evaluating mode real-time monitoring of CPR metrics provides feedback of time to CPR, compression depth and rate, ventilation rate and volume, “no-flow” time, and number of cycles.

## eCPR™ Performance Reports

Set parameter goals, evaluate individual and/or team efforts, and save and share reports to discuss and improve CPR.

## Data-rich Debriefing Tools

Automatically records events during simulation. Select from lists of common actions specific to a scenario type or algorithm. Save and share session logs for archiving and debriefing.

## Why Choose the HAL® S315.600 CPR+D Skills Trainer with OMNI®2 Full-Body Option for Your Simulation Lab in India?

The HAL® S315.600 CPR+D Skills Trainer with OMNI®2 Full-Body Option (Item No. S315.600.250.705) by Gaumard, USA delivers the complete CPR+D training experience of the S315.600 platform in a full-body manikin configuration — making it the preferred choice for simulation labs and training programmes in India that need both the realism of a full-body adult patient and the data-driven feedback of Gaumard's OMNI®2 system in a single, portable unit. This is the same highly capable BLS skills trainer as the torso version, with the added presence and spatial realism of a complete body — beneficial for team training scenarios where positioning, patient assessment, and post-resuscitation care are practiced in addition to CPR and defibrillation skills.

The trainer covers every key element of BLS and CPR+D training. The intubatable airway supports nasal and oral intubation with standard real adjuncts, and realistic chest rise is clearly visible during BVM ventilation. Spontaneous chest rise and palpable pulses activate without any add-on items. The programmable ECG displays over 20 pre-programmed shockable and non-shockable rhythms, and real AED or defibrillator equipment can be used directly on the manikin's conductive skin patches or pad-free posts with up to 360 joules of real energy — no training electrodes required. Return of spontaneous circulation (ROSC) recognition training is built in. The all-in-one design eliminates external pumps, compressors, or attachments, keeping the unit fully portable for both in-house professional development and outreach CPR instructor programmes.

The OMNI®2 wireless controller provides CPR coach mode with audible tone guidance for compression rate and ratio, and evaluating mode with real-time eCPR™ monitoring of compression depth, rate, ventilation rate and volume, no-flow time, and cycle count. eCPR™ performance reports can be set against parameter goals, saved, and shared for structured debriefing. Session events are automatically recorded with scenario-specific action logs for archiving.

This trainer is ideal for BLS and ACLS certification programmes, emergency medicine departments, nursing and paramedic training institutes, hospital in-service training units, and NMC-mandated simulation labs across India that prefer a full-body resuscitation platform with integrated real-time feedback.

**Why Buy from SEM Trainers?** SEM Trainers & Systems is an authorized Gaumard distributor in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation and OMNI®2 software setup, faculty orientation workshops, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

## Frequently Asked Questions

**Q: How does this differ from the HAL® S315.600 CPR+D and ECG Skills Trainer (S315.600.250.PK1)?**

A: This version (S315.600.250.705) is the full-body configuration of the same trainer. The core CPR+D and OMNI®2 features are identical — the difference is the addition of legs and a complete body, which adds realism for team-based resuscitation training and patient positioning practice.

**Q: Does SEM Trainers provide installation and training support?** A: Yes. We provide on-site setup, OMNI®2 configuration, hands-on demonstration, and faculty orientation anywhere in India.

**Q: What is the warranty and how do I get support?** A: All Gaumard products carry standard manufacturer warranty. For support, reach us at [sem@semtrainers.com](mailto:sem@semtrainers.com) or call +91-88495 63724.
