SKU:

Categories: Patient Monitor Simulators

Product Description

Simulation of the Medutrigger, designed for the qubeMS2 ventilation simulator based on the WEINMANN Medumat Standard2. In certain situations, it is necessary to trigger ventilation breaths as needed individually. This is especially true in emergency medicine during cardiopulmonary resuscitation and anesthesia induction (RSI). With the unique qubeTRIGGER, SKILLQUBE makes this possible even during simulated mechanical ventilation.
Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of SKILLQUBE products in India with over 30 years of experience supplying advanced patient monitor and ventilation simulation equipment to 1,500+ institutions across 28 states. We provide pan-India delivery, installation, and dedicated after-sales support.

FAQ Q: When is manual breath triggering needed during simulation? A: Primarily in emergency medicine scenarios like CPR and rapid sequence induction (RSI), where individual breaths need to be triggered on demand.

Q: How do I order from SEM Trainers? A: Contact sem@semtrainers.com or call +91-88495 63724 for

pricing and availability.
