Chest Plate — Body Region Accessory for Whole Body Phantom "N1"

The Chest Plate (Item No. **[CONFIRM — currently duplicated as PH-1]**) by Kyoto Kagaku, Japan is a chest region body plate designed for the "N1" whole body phantom, allowing institutions to add or configure chest-region anatomy on the base phantom.

Important — body region sold separately. This chest plate does not include the body region itself; it's an add-on component meant to work alongside your existing N1 phantom setup. Confirm compatibility and what additional parts you may need with our team before ordering.

Materials: urethane-based resin (soft tissue, density 1.06), epoxy resin (synthetic bone, density 1.31). No metal parts or liquid structures.

What's included: 1 chest plate.

Developed under supervision of Kiyoshi Murata, Professor, Department of Radiology, Shiga Medical University, and Norihisa Nitta, Director of Angiography Center, Kyoto Okamoto Memorial Hospital.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of Kyoto Kagaku products in India with over 30 years of experience supplying medical simulators and clinical skills trainers to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Does this include the body region/phantom base? A: No — the body region is not included. This is a chest plate accessory for use with your existing N1 whole body phantom.

Q: Is this the same as the Breast Plate for the LUNGMAN chest phantom? A: No — that's a different product built for a different purpose (simulating breast tissue absorption on the LUNGMAN phantom). Confirm which specific accessory you need with our team before ordering.
