Why Choose the Stomach Phantom BMU-1 for Double-Contrast Gastrography Training in India?

The Stomach Phantom BMU-1 (Item No. PH-18, Brand: Kyoto Kagaku, Japan) reproduces a life-size distended stomach for double-contrast gastrography training, with lesions modeled from real clinical specimens — early cancer and gastric ulcer. Barium can be poured into the stomach for realistic contrast imaging.

Training applications:

- Double-contrast gastrography

Case/pathology simulation: Lesions modeled from real specimens — early cancer, gastric ulcer.

Set includes: 1 stomach phantom, 1 storage case.

Specifications:

- Size approx. W30×20×H33cm
- Packing size approx. W51×D39×H51cm (W20.1×D15.4×H20.1in)
- Weight approx. 16kg
- Packing weight approx. 20kg (44lb)
- Materials: Soft tissue — urethane-based resin (density 1.31)

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Kyoto Kagaku

products in India with over 30 years of experience supplying gastrointestinal radiography training phantoms to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What's the difference between this and the Rotation Stomach Phantom TMP-R? A: This BMU-1 model is a stationary phantom, while the TMP-R adds a motorized rotation system to simulate patient movement during examination.

Q: What pathologies does this phantom simulate? A: Early cancer and gastric ulcer lesions, both modeled directly from real clinical specimens for anatomical accuracy.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
