Rotation Stomach Phantom TMP-R

Item No. PH-19
Weight
Brand KYOTO KAGAKU, JAPAN

[Read More](#)

SKU:

Categories: Radiology Phantom

Product Description

Features

1. Rotation system to simulate the movement of patient. /
2. Life-size distended stomach with lesions modeled from real specimens: early cancer and gastric ulcer. /
3. Barium can be poured in the stomach for imaging.

Why Choose the Rotation Stomach Phantom TMP-R for Double-Contrast Gastrography Training in India?

The Rotation Stomach Phantom TMP-R (Item No. PH-19, Brand: Kyoto Kagaku, Japan) reproduces a life-size distended stomach for double-contrast gastrography training, with lesions modeled from real clinical specimens — early cancer and gastric ulcer. A motorized rotation system simulates patient movement during the examination, and barium can be poured into the stomach for realistic contrast imaging.

Training applications:

- Double-contrast gastrography

Case/pathology simulation: Lesions modeled from real specimens — early cancer, gastric ulcer.

Set includes: 1 stomach phantom, 1 rotation unit, 1 controller, 1 phantom holder, 1 model of lesions, 1 storage case.

Specifications: CE Certification: Not CE certified.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Kyoto Kagaku products in India with over 30 years of experience supplying gastrointestinal radiography training phantoms to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What pathologies does this phantom simulate? A: Early cancer and gastric ulcer lesions, both modeled directly from real clinical specimens for anatomical accuracy.

Q: Is this phantom CE certified? A: No — please confirm current certification requirements with your institution's procurement guidelines before including this in a tender-based purchase.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
