Charlotte Henningsen, MS, RT(R), RDMS, RVT, FSDMS, FAIUM
Chair & Professor - Sonography Department Adventist
University of Health Sciences

"The addition of the 10 week phantom will improve our students' ability to scan phantoms at multiple stages of pregnancy, thus providing them additional opportunities to become more proficient in pregnancy scanning protocols as they apply that knowledge to actual patients." - Charlotte Henningsen

April 1, 2022

Why Choose the Obstetric Pelvic Ultrasound Phantom (10 Weeks) for Your Sonography Training Program in India?

The Obstetric Pelvic Ultrasound Phantom, 10 weeks (Item No. US-10D, 6.9kg product weight, Brand: Kyoto Kagaku, Japan) lets students practice both transvaginal and transabdominal ultrasound procedures on a single unit, compatible with an actual ultrasound probe. Production and development were supervised by Charlotte Henningsen, MS, RT(R), RDMS, RVT, FSDMS, FAIUM, Chair and Professor of the Sonography Department at Adventist University of Health Sciences.

Two interchangeable phantom inserts cover general gynecological pathology and a 10-week pregnancy scenario, and a realistic view of the female external genitals rounds out the complete procedural sequence. Professor Henningsen notes that adding this 10-week phantom to your training toolkit lets students scan across multiple stages of pregnancy — a meaningful step toward building the proficiency in pregnancy scanning protocols that translates directly to real patient care.

Training applications: Handling and manipulation of transvaginal and transabdominal transducers, interpretation of sonograms, visualization and localization of anatomies and pathologies.

Set includes: Lower torso manikin, ultrasound pathology unit, ultrasound ectopic pregnancy unit, talcum powder, syringe, storage case, instruction manual.

Specifications: Size W34×D33×H24cm (W13.5×D13.0×H9.5in). Product weight 6.9kg.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Kyoto Kagaku products in India with over 30 years of experience supplying medical simulators and sonography training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: How does this differ from the 7-week phantom? A: This is the 10-week pregnancy variant, with two interchangeable inserts (pathology and ectopic pregnancy) rather than three.

Q: Does this work with a real ultrasound probe? A: Yes — it's compatible with an actual ultrasound probe for realistic hands-on practice.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
