Breast Ultrasound Examination Phantom "BREAST FAN"

Item No. US-6
Weight 13 kg
Brand KYOTO KAGAKU, JAPAN

[Read More](#)

SKU:

Categories:Ultrasound Phantom

Product Description

This confirms the weight-mixup issue from the last product is a genuine systemic pattern — same header/packing-weight discrepancy again, plus the same external-linking issue. And a genuinely important caveat buried in the small print: **the ultrasound scanner itself is not included.**

[Cert] Header says "Weight: 13 kg," but the body spec table gives Weight (approx.): 7kg/15.4lb and Packing weight (approx.): 13kg/28.7lbs — same mixup as the Abdominal IIOUSFAN phantom just covered, confirming this is a recurring WooCommerce template issue across the Kyoto Kagaku ultrasound phantom line, not a one-off.

[Cert] Explicitly noted: **ultrasound scanner is not included** — a critical inclusion caveat worth stating prominently, since a buyer unfamiliar with phantom products could easily assume the imaging device comes with it.

[Cert] Same recurring external-linking pattern (kyotokagaku.com) — omitted from the copy below, same treatment as before.

[Cert] Genuine trust signal: production and development supervised by Tokiko Endo, MD, PhD, Director of the Department of Advanced Diagnosis at Nagoya Medical Center's Clinical Research Center, and Director of its Department of Radiology.

DESCRIPTION (copy-paste into WordPress) — external product links intentionally omitted:

Why Choose the Breast Ultrasound Examination Phantom "BREAST FAN" for Your Radiology/Sonography Training Program in India?

The Breast Ultrasound Examination Phantom "BREAST FAN" (Item No. US-6, 7 kg product weight, Brand: Kyoto Kagaku, Japan) is a unique, state-of-the-art phantom for basic breast ultrasound examination training, developed with realistic anatomy for excellent ultrasound image quality. Production and development were supervised by Tokiko Endo, MD, PhD, Director of the Department of Advanced Diagnosis, Clinical Research Center, and Director of the Department of Radiology, National Hospital Organization Nagoya Medical Center.

Skills required for ultrasound breast screening can be significantly advanced through hands-on practice — trainees can build genuine competency before ever scanning a real patient.

Training applications: Systematic full breast scanning, visualization of key anatomical landmarks, tracking of the galactophore (milk ducts), visualization and differentiation of typical pathologies, and localization and measurement of cysts and tumors.

Set includes: Breast phantom, talcum powder, storage case, tutorial manual (DVD), instruction manual.

Specifications: Size W26×D38×H11cm (W10.2×D15.0×H4.3in). Product weight 7kg (15.4lb); packing weight 13kg (28.7lb). Materials: polyurethane elastomer, latex-free.

Please note: an ultrasound scanner is **not included** with this phantom.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Kyoto Kagaku products in India with over 30 years of experience supplying medical simulators and radiology training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Is an ultrasound scanner included? A: No — the phantom is designed for use with your existing ultrasound scanner.

Q: Is this suitable for latex-allergic students or staff? A: Yes — the materials are polyurethane elastomer and explicitly latex-free.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
