Pediatric Physical Examination Simulator (MW71)

The Pediatric Physical Examination Simulator (Item No. MW71, 3 kg, 67 cm) by Kyoto Kagaku, Japan is a full-body simulator of a one-year-old toddler, built for training in vital sign measurement and physical examination.

Reproduces genuine toddler physical characteristics, covering the examinations required in pediatric consultations and nursing care.

Comprehensive physical examination skills covered: measurement of vital signs, physical examination, preparation, patient positioning, observation of eyelids, observation of the nasal/ear cavity, observation of the lumen, and palpation of the anterior fontanelle.

Developed under expert clinical supervision, with production overseen by Kazunari Kaneko, M.D., Ph.D. (Director and Dean of Medicine, Kansai Medical University) and Eri Moriguchi, M.D., Ph.D. (Associate Professor of Nursing, Kyoto Koka Women's University) — ensuring the simulator reflects genuine clinical examination practice.

Comes ready for classroom use, including 1 toddler full-body manikin, 1 wig, 1 simulated stethoscope, 1 simulated sphygmomanometer, 1 simulated clinical thermometer, 1 controller, 1 AC adapter, 1 pajama, 1 hat, and an instruction manual.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of Kyoto Kagaku products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.
