Categories: Adult Patient Care

Product Description

New,innovative and ultra-realistic touch, designed to standardize the palpation experience

Features	1. Provides opportunities of hands-on training2. Abnormal findings to complement training with healthy simulated patients 3. Ensure that trainees share the same tactile sensation to specify the findings
Training skills / Applications	Palpation of head, neck for lymph nodes,thyroid and salivary glands / Combine the palpation skills with findings and clinical reasoning
Case / Pathology	1 Posterior auricular nodes / 2 Occipital nodes / 3 Superficial cervical nodes / 4 Posterior cervical nodes / 5 Deep cervical nodes / 6 Pre-auricular nodes / 7 Tonsillar nodes / 8 submandibular nodes / 9 submental nodes / 10 Supraclavicular nodes / 11 Subclavicular(infraclavicular)nodes / 12 Thyroid gland / 13 Submandibular gland / 14 Parotid gland
Set includes	1 head and neck manikin with storage case / 1 instruction manual
Materials	Soft resin / Latex free
Production ? Development Supervision	Junji Otaki, Professor and acting chief of the center,Center for Medical Education, Hokkaido University
Update	March 18, 2022

Head and Neck Palpation Trainer (MW30)

New, innovative, and ultra-realistic touch, designed to standardize the palpation experience. The Head and Neck Palpation Trainer (Item No. MW30) by Kyoto Kagaku, Japan provides opportunities for hands-on training, with abnormal findings that complement training with healthy simulated patients.

Consistent tactile sensation across every trainee. Ensures that trainees share the same tactile sensation to specify findings — a level of standardization real patients can't provide.

Comprehensive palpation training. Covers palpation of the head and neck for lymph nodes, thyroid, and salivary glands, combining palpation skills with clinical findings and reasoning.

14 distinct anatomical structures represented, including posterior auricular nodes, occipital nodes, superficial cervical nodes, posterior cervical nodes, deep cervical nodes, pre-auricular nodes, tonsillar nodes, submandibular nodes, submental nodes, supraclavicular nodes, subclavicular (infraclavicular) nodes, the thyroid gland, submandibular gland, and parotid gland.

Developed under expert clinical supervision. Production and development were supervised by Junji Otaki, Professor and Acting Chief of the Center for Medical Education, Hokkaido University.

Comes complete with: 1 head and neck manikin with storage case, and an instruction manual. Made from soft resin and is latex-free.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of Kyoto Kagaku products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What anatomical structures can be palpated on this trainer? A: 14 structures, including multiple lymph node groups plus the thyroid, submandibular, and parotid glands.

Q: What's included? A: A head and neck manikin with storage case, and an instruction manual.
