Newborn Vital Signs Examination Simulator (M58)

The Newborn Vital Signs Examination Simulator (Item No. M58, 1.1 kg, 50 cm) by Kyoto Kagaku, Japan is a life-size newborn manikin built for basic vital sign assessment training.

Realistic, synchronized vital signs. Arterial pulse is present at the wrists, neck, and temples, with heart sounds recorded from actual patients and synchronized with the arterial pulses for authentic, correlated vital sign readings.

Fully controllable via a dedicated control unit, letting instructors adjust all vital signs to match different training scenarios.

Comprehensive assessment skills covered: vital signs examination, heart sounds, respiration, superficial temporal/carotid/radial artery pulses (bilateral), and body temperature via rectal thermometry.

Comes ready for classroom use, including 1 newborn manikin, 1 control box, 1 thermometer, 1 baby cloth, 1 storage case, and an instruction manual.

Powered and certified for institutional use. Runs on AC100-240V (approx. 30W), made from soft resin, latex-free, and CE certified.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of Kyoto Kagaku products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions
