Product Description

Why Choose the Suprapubic Catheter Care Simulator (Kyoto Kagaku) for Your Nursing Skills Lab in India?

The Suprapubic Catheter Care Simulator (Item Nos. MW58/MW59, Brand: Kyoto Kagaku, Japan) trains

the specific skills involved in managing a suprapubic catheter — a different clinical scenario from standard urethral catheterization, relevant for patients who cannot be catheterized transurethrally.

Training skills covered: Changing suprapubic catheters, suprapubic catheter care (securing the catheter in place), placement of transurethral balloon catheters, and enema administration in lateral positions.

What's included: Lower torso manikin, genitalia organ unit, 4 valves, irrigation bottle, 3 irrigation drainage tubes, instruction manual.

Please confirm before ordering: which item number (MW58 or MW59) corresponds to your required configuration — the source specification doesn't distinguish between the two.

Important regulatory note: This device is **not CE certified**. If your institution's procurement process references CE marking as a requirement, confirm this is acceptable before ordering.

Related Kyoto Kagaku products: MW52 (Female Catheterization/Enema Simulator), MW2A (Male Catheterization/Enema Simulator), MW53/54/55 (Strap-on Catheterization/Enema Simulator) — useful companions for a complete continence-care training curriculum.
