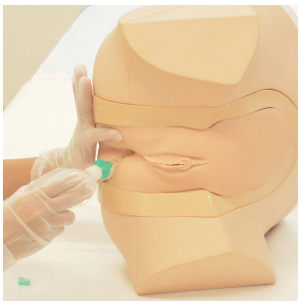
SKU:

Categories: Catheterization



Product Description

Why Choose the Female Catheterization/Enema Simulator (Kyoto Kagaku) for Your Nursing Skills Lab in India?

The Female Catheterization/Enema Simulator (Item No. MW52, 3.4 kg, 34 × 33 × 24 cm) by Kyoto

Kagaku, Japan is a high-quality trainer covering three related clinical skills in one compact unit: urethral catheterization, perineal care, and enema administration. Soft, flexible, latex-free genitalia allow realistic cleaning and procedural preparation, and successful catheter insertion is confirmed by fluid outflow — giving students clear, immediate feedback.

The detachable external genitalia design makes cleaning and part replacement straightforward, and the enema function is trained in the correct lateral position, matching real clinical practice.

Training skills covered: Intermittent catheterization, indwelling catheterization, perineal care and enema administration, localization of the urethral meatus, cleansing and aseptic technique, catheter insertion and placement, catheter removal, and manual bladder compression.

What's included: Lower torso manikin, genital organ unit, 3 valves (one pre-installed), irrigation bottle, rectum tube, 3 irrigation drainage tubes, lubricant, storage case, instruction manual.

Recommended device: 14 Fr urinary catheter.

Related Kyoto Kagaku products: MW2A (Male Catheterization/Enema Simulator), MW53/MW54/MW55 (Strap-on Catheterization/Enema Simulator), MW23 (Adult Diaper Training Simulator) — useful companions for labs building out a full continence-care curriculum.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Kyoto Kagaku products in India with over 30 years of experience supplying medical simulators and clinical skills training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: Is this suitable for latex-allergic students or staff? A: Yes — the materials are soft resin and explicitly latex-free.

Q: What catheter size is recommended? A: A 14 Fr urinary catheter.

Q: Is there a male equivalent? A: Yes — the MW2A Male Catheterization/Enema Simulator, sharing compatible replacement valves with this model.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.

High quality simulators for urethral catheterization, perineal care and enema practice

Features

```
1. Soft and flexible genitalia allow proper cleaning and procedural preparation 2. Successful insertion confirmation by fluid outflow 3. Enema insertion in lateral position 4. Detachable external genitalia
