Categories: Human Torso Models

Product Description

This half-life-size torso model features distinctly Asian facial characteristics, accurately representing anatomical details with realistic features. It is an excellent tool for teaching basic anatomy. Composed of the following 16 parts: head, divided into 2 parts, which shows a section of the brain and the upper respiratory tract; half of the brain, showing internal structures; 2 lungs; heart in 2 parts showing the atria, ventricles and valves; liver with gallbladder; stomach; single piece including small intestine, large

intestine and pancreas; removable covering that exposes the interior of the cecum; male reproductive organs in 2 parts; female reproductive organs in 2 parts; Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 6 lbs. Dimensions. (Inches): 8.27 x 6.3 x 19.69
