Categories: Human Torso Models

Product Description

A light-skinned torso model that is half life size. It is an excellent tool for teaching basic anatomy. Composed of the following 16 parts: head, divided into 2 parts, which shows a section of the brain and the upper respiratory tract; half of the brain, showing internal structures; 2 lungs; heart in 2 parts showing the atria, ventricles and valves; liver with gallbladder; stomach; single piece including small intestine, large intestine and pancreas; removable covering that exposes the interior of the cecum; male reproductive organs in 2 parts; male and female reproductive organs in 2 parts; Mounted on base; Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 6 lbs. Dimensions. (Inches): 8.27 x 6.3 x 19.69
